

Huobi

Huobi Research Weekly (Vol.17)

2018/7/2

Abstract

Market cap and transaction volume of cryptocurrencies generally increased this week, with 72 of the TOP100 currencies increasing to varying degrees. On July 2nd, the total market cap of the TOP100 cryptocurrencies increased to 244.776 billion dollars, an 3.97% increase from last week. A total of 7 new projects entered the TOP100. On July 2, Bitcoin's price was 6377.78 US dollars, up 6.61% from last week, and Ethereum price was 453.98 US dollars, down 0.07%. **HB10's price increased by 7.22% this week.**

Bitcoin's average number of unconfirmed transactions per block decreased by 28.3%. Number of unconfirmed transaction in Ethereum increased 178% from last week. Bitcoin's transaction fees greatly increased. The 7-day number of unconfirmed transactions for Bitcoin and Ethereum are 2421 and 44843, respectively. Bitcoin's Hashrate increased by 9.37% and Ethereum's decreased by 0.05%. The average transaction fees on the Bitcoin and Ethereum network this week were \$0.687 and \$2.355, decreasing 33.7% and increasing 580% respectively. Total number of addresses and addresses on the Bitcoin and Ethereum network reached 25.77 million, and 40.39 million, respectively.

The most active group on Github was ELF, The team had 200 commits in the past week. Mainframe was the most popular group on Telegram. In terms of community activity, Bitcoin, Ethereum, and Ripple remain as the top 3 most popular communities on Facebook and Twitter. **According to <Huobi Data Analytics Weekly>, and Reddit Keyword Map, Bitcoin, Bot (Robot) and Coinbase are the hottest discussion topics. Among the top three search engines, searches for Ethereum and Smart Contract increased, while searches for topics related to Cryptocurrencies and Blockchain in general decreased.**

The US had the most ICOs this week, with Blockchian platform projects being the most popular ICO project category. Judging from the project types of the 127 ICO projects that were categorized, most projects are Platform projects, Financing, Culture and Entertainment, Gambling and Asset-backed coins. 11 investment activities took place in the Blockchain industry this week. It is worth noticing that traditional company or investors like Shunwei, Haier and Sohu are entering the market. High Performance Blockchain acquired an A Round investment of more than 10 million USD from OKcoin and Starwin Capital, the most raised this week.

1. Weekly Market Review

1.1 Market overview

This week, the overall market capitalization for the TOP100 cryptocurrencies increased, with 28 projects experiencing decline in varying degrees. According to coinmarketcap, as of July 2, 2018, the total market cap of the TOP100 cryptocurrencies was 244.776 billion U.S. dollars, an increase of 3.97% from last week. On the other hand, PPT had the largest increase of 52.66%, bringing its rank up to No.40. POWR had the second largest increase of 52.66%, and its market cap ranking increased 29 places to No.82. In addition, there were 7 projects that entered TOP100, CTXC(market cap increased 46.12%, ranking up 25 places), POWR (market cap increased 52.66%, ranking up 29 places), MCO (market cap increased 47.56, ranking up 24 places), THETA (market cap increased by 40.86%, ranking up 19 places), WICC (market cap increased by 41.77%, ranking up 21 places), WAX (market cap increased by 31.14%, ranking up 19 places), and XIN (market cap decreased by 3.42%, ranking unknown). The highest increase in price this week was PPT, increasing by 57.56%. The largest decrease in price this week was CNX, decreasing by 13.04%. As of July 2nd, 2018, Bitcoin was traded at 6377.87 USD, 6.61% higher than its price last week. Ethereum was traded at 453.98 USD, 0.07% lower than its price last week.

Table 1.1: Top Five Price Increases and Decreases

Symbol	Price decrease	Symbol	Price increase
CNX	-13.04%	PPT	57.56%
MOAC	-11.60%	POWR	52.66%
KCS	-9.87%	WICC	47.66%
DDD	-9.78%	MCO	47.51%
TRX	-9.42%	CTXC	46.12%

The overall 24h trading volume increased slightly this week, with an increase of 6.05% compared with last week. Overall, the 24h trading volume increased by 6.05% compared with the same period of last week. In this week, 18 projects of the TOP100 project increased by more than 100% in 24h trading volume, of which the highest was POWR with an increase of

7629.14%, followed by STEEM with an increase of 1542.16% compared to last week. This week, there were 37 projects that saw a decrease in trading volume. 2 projects fell more than 50%, of which the lowest was VERI, a drop of 67.57%.

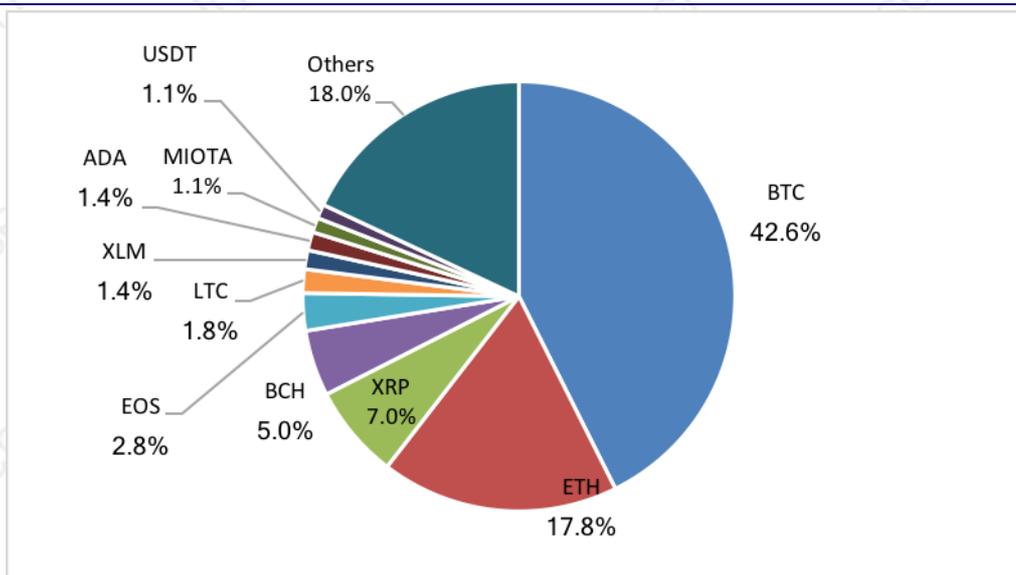

Figure 1.1: The Market cap and 24-hour Trading Volume for TOP100 cryptocurrencies

Source: coinmarketcap

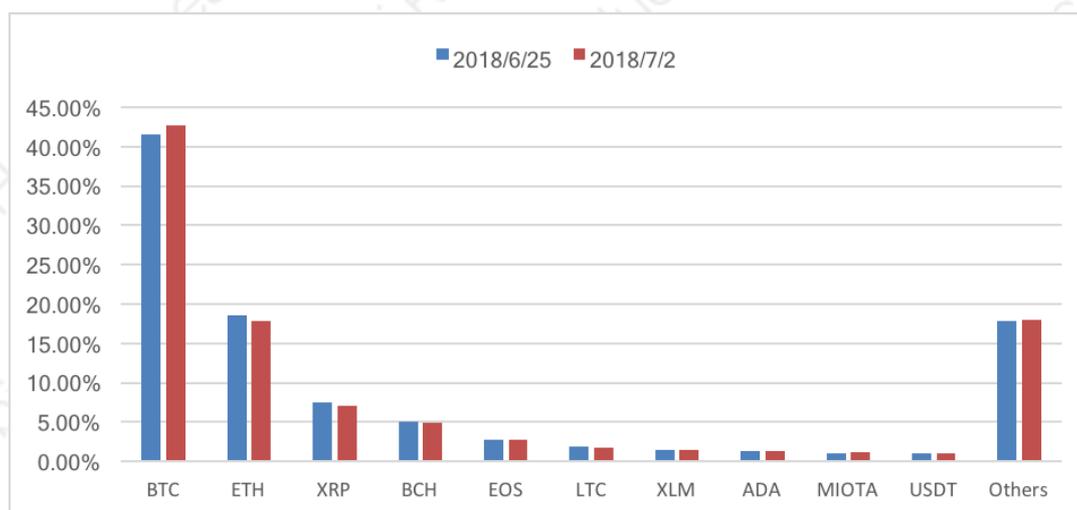

The TOP10 cryptocurrencies' market share distribution remained stable, but the 90% of market caps has increased to varying degrees. On July 2nd, the overall market cap of the TOP10 cryptocurrencies was 210.055 billion USD, an increase of 3.82% from last week, accounting for 82.00% of the total market capitalization of cryptocurrencies, maintaining a stable market share compared to last week. BTC's market capitalization had the largest decrease of 6.69%. ADA came second with a decrease of 5.50%. BTC's market share was 42.64%, a slight increase of 1.06% compared to last week.

1.2 Segment Analysis

The market cap of platform projects increased the most, among which average market cap of coin projects increased the most. As of July 2nd, 2018, the total market cap of coin class projects in the TOP100 increased by 6.14% compared to last week, which is the biggest increase among all class.

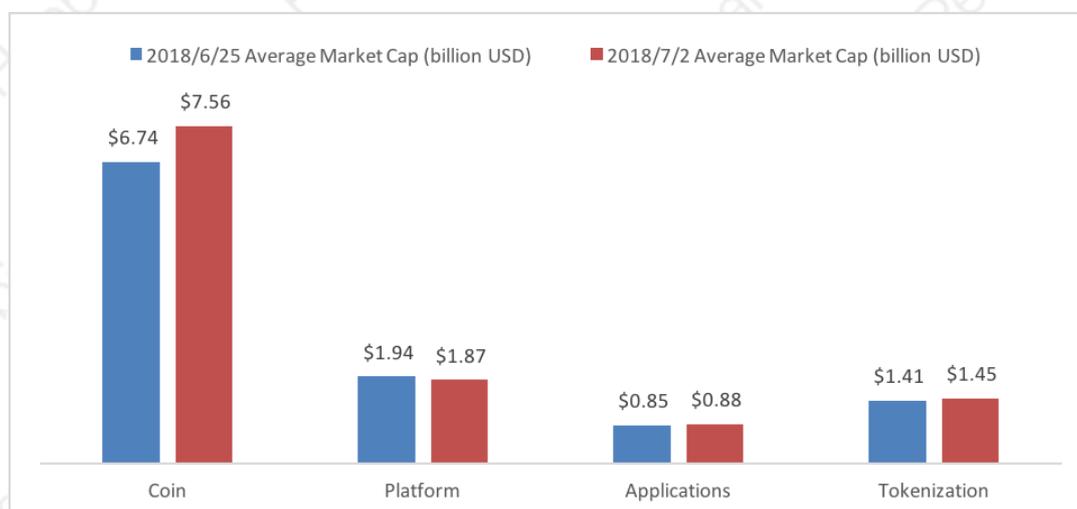

In addition, the average market cap for coin projects this week was 7.556 billion US dollars, an increase of 12.03% compared to last week.

Figure 1.4: TOP100 Cryptocurrencies Market Segment Capitalization

Figure 1.7: TOP100 Cryptocurrencies Segment Market Share

Source: coinmarketcap

Note: According to the different attributes of cryptocurrencies, Huobi Research will divide them into four categories: Coin, Application, Platform and Tokenization.

Coin: The coin category refers to cryptocurrencies that aim to solve the problems of modern day fiat currencies, providing benefits like decentralization, improved safety, lower transaction fees, and faster confirmation speeds. The most popular coin cryptocurrency is Bitcoin. The value of coin cryptocurrencies lies in its ability to act as a medium of exchange.

Blockchain Platform: The Blockchain platform category refers to Blockchain projects that provide a platform upon which developers can create applications using the underlying Blockchain. Applications can utilize the platform's Blockchain without needing to create one themselves. Blockchain platform assets grant the right to use and participate in the platform.

Blockchain Application: The Blockchain application category refers to Blockchain projects that have specific use cases. These could either utilize their own Blockchain, or exist on a Blockchain platform as a "dApp". Blockchain application assets grant the right to use and participate in its use cases, and its value lies in the application's ability to perform its function.

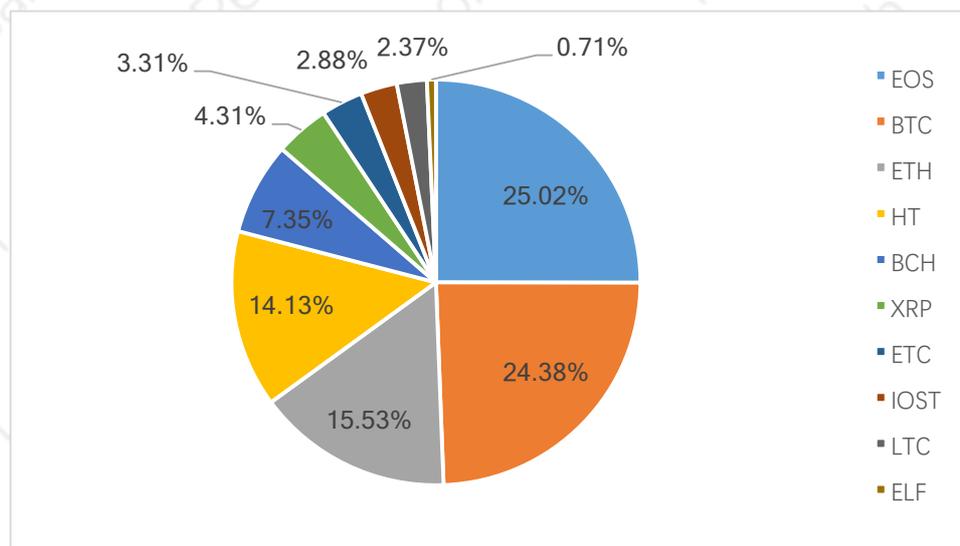

Tokenization: The tokenization category refers to Blockchain projects that is linked to actual assets like gold or USD. The most popular tokenization project is Tether. The value of a tokenization asset lies in the value of the underlying physical assets.

1.3 HB10 Index

The Huobi Power Index (HUOBI 10) rose 7.22% this week. According to the

platform data of the Huobi Global Exchange, as of early morning of July 2, 2018, the index was 786.42, comparing to 733.47 at the same time last week, an increase of 7.22% in the 7-day period; the highest level was 828.64 in the middle of the week and the lowest was 727.92.

Figure 1.8: HB10 Cryptocurrencies Segment Ratio

Source: Huobi global exchange platform, Huobi Research

Note: Huobi10 is composed of 10 currencies with large scale and good liquidity in Huobi Pro, which can comprehensively reflect the overall performance of the market. The index sample space is all USDT transaction currencies for the online transaction of Huobi Pro, which is composed of three types of assets: "currency", "platform" and "application" according to the different attributes of the Blockchain assets. We calculate the weight of the constituent currency using the weight of the composite price index formula every 15 seconds.

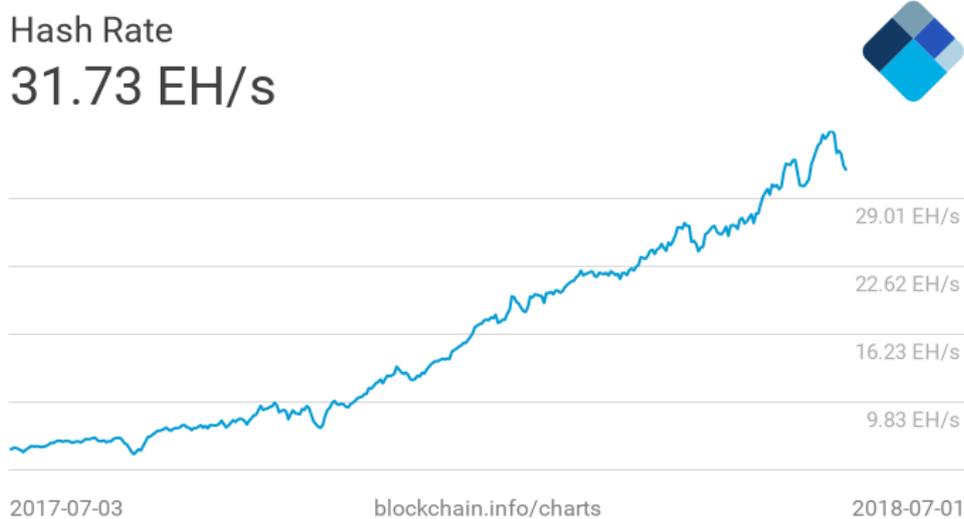

2. Technical Statistic

2.1 Cryptocurrency Mining Statistics

Hashrate of Bitcoin and Ethereum increased this week. From June 25th to July 1st, 2018, the average bitcoin hashrate for the entire network reached 31.73 EH/s, a decrease of 9.37% from the previous week.

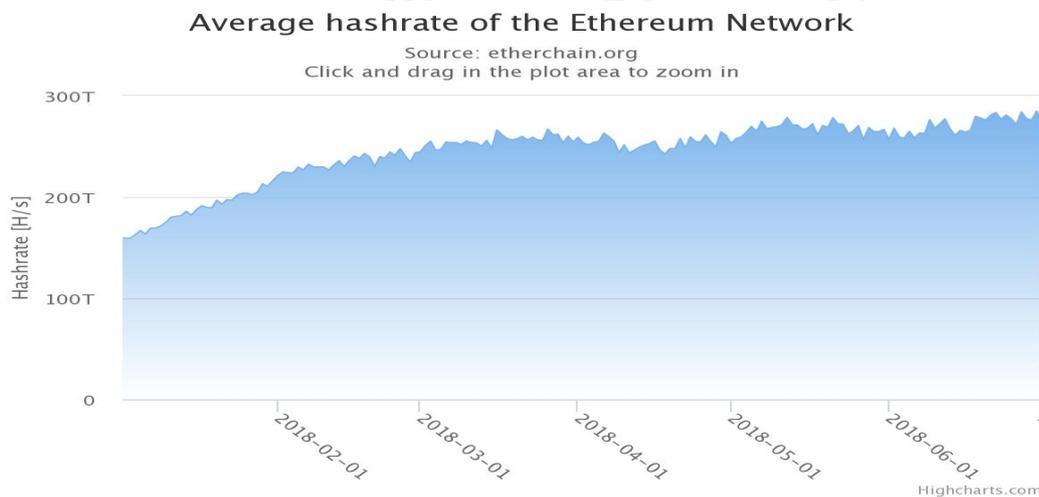

Average hashrate for the entire Ethereum network was 278.051 TH/S this week, a decrease of 0.05% from the previous week.

Figure 2.1: Bitcoin Hashrate Changes

Source: blockchain.info

Figure 2.2: Ethereum Hashrate Changes

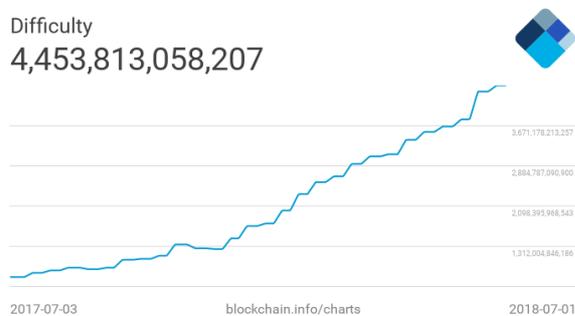

Source: etherchain

This week, the difficulty of mining in Bitcoin and Ethereum has slightly increased. At July 2nd, 2018, Average difficulty for mining Bitcoin this week was 4.25T, which is an increase of 12.7% compared with the previous

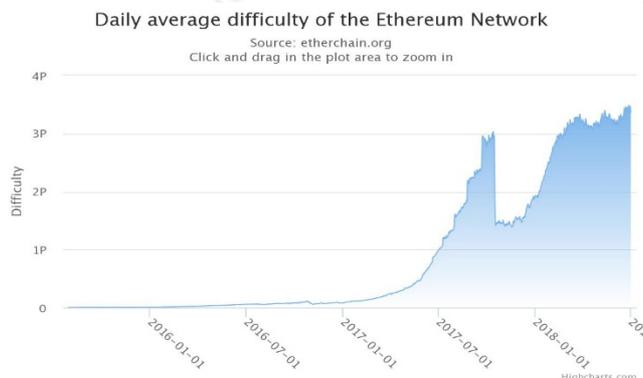

week. The average difficulty of mining Ethereum this week was 3.208P, an increase of 0.17% compared with the previous week.

Figure 2.3: The Difficulty of Mining in Bitcoin

Source: blockchain.info

Figure 2.4: The Difficulty of Mining in Ethereum

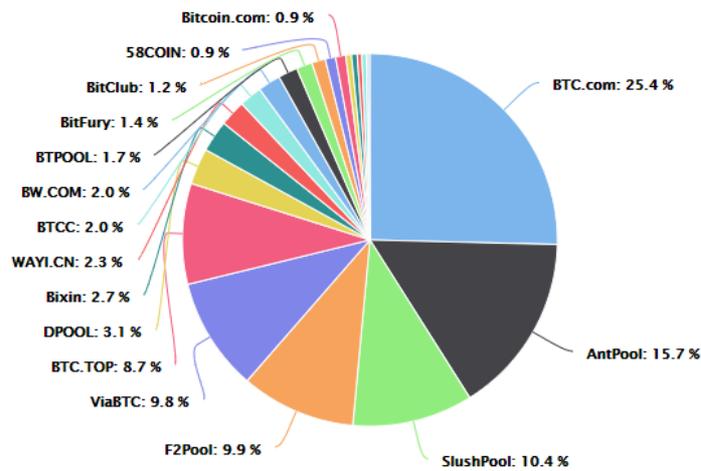

Source: etherchain

The percentage of BTC.com in the overall mining pool market slightly decreased, with ViaBTC entering Top 5, but the overall distribution of the top 5 mining pools remained stable. From June 25 to July 1st, 2018, Bitcoin mined 1026 blocks in the past week, a decrease of 9.13% from the previous week. Among the top five pools were BTC.com, AntPool, SlushPool, F2Pool, and ViaBTC. Those 5 pools mined 260, 160, 104, 102 and 101 respectively, accounting for 25.24%、 15.59%、 10.14%、 9.94% and 9.84%. The Hashrates were 9.35EH/s, 5.75EH/s, 3.74EH/s, 3.67EH/s and 3.63EH/s respectively.

In the past week, Ethereum's entire network mined 40455 blocks, which was an increase of 1.48% from the previous week. The top five pools are Ethermine, f2pool_2, SparkPool, Nanopool, and miningpoolhub_1, which mined 11066, 7064, 6543, 4705, and 4159 blocks respectively, accounting for 27.35%, 17.64%, 16.17%, 11.63%, and 10.28% respectively.

2.2 Activity Statistics

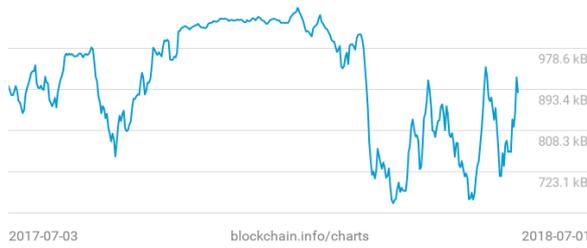

Bitcoin’s block size increased but the average number of transactions per block increased. Average number of transaction remained stable for Ethereum, and block size slightly increased. According to blockchain.info, from June 24 to July 1, 2018, the average number of transactions per block on Bitcoin was 11319, an increase of 6.11% from last week. The average size of each block was 887.4 Kbs, an increase of 12.57% from last week.

According to etherchain, the average number of transactions per block in Ethereum this week was 125.4, remaining stable compared with the previous week. The average size of each block was 23673 bytes, which was an increase of 1.97% compared to last week.

Figure 2.9: Evolution of the average size of an Ethereum block

Source: etherchain

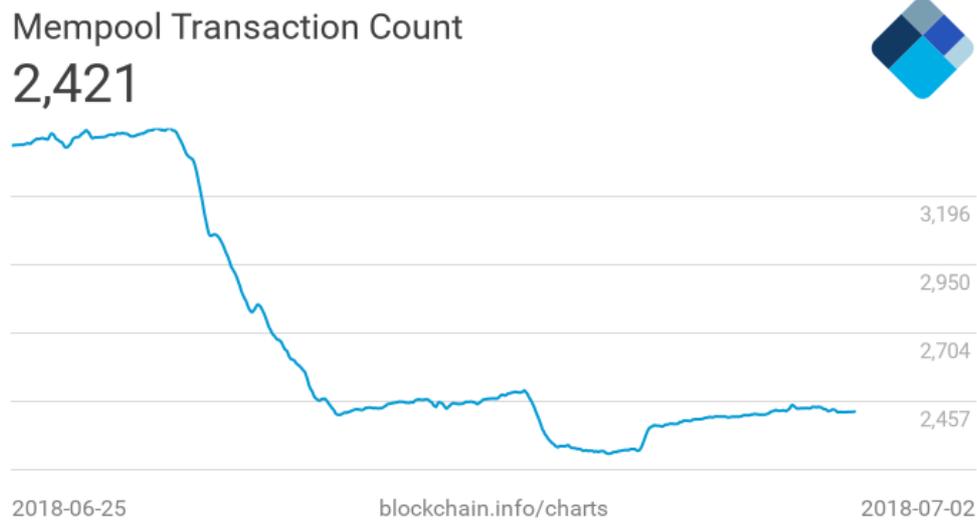

Figure 2.10: The number of transactions per day

Source: etherscan.io

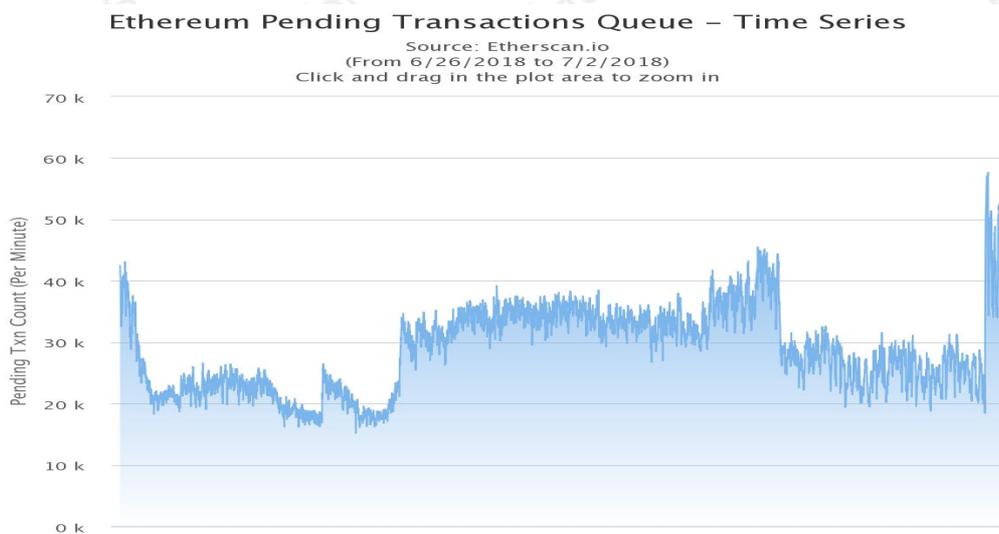

Number of unconfirmed transactions in Bitcoin and Ethereum decreased 28.3% and increased 178% respectively comparing to last week. As of July 1st, 2018, the number of 7-day average unconfirmed transactions in Bitcoin network was 2421, a decrease of 28.3% from last week. As of July 1st, the number of unconfirmed transactions in Ethereum network this week was 44843, a big decrease of 178% from last week. The lowest amount of unconfirmed transactions this week was 15155 and the highest amount reached 57682.

Figure 2.11: Unconfirmed Transaction in Bitcoin

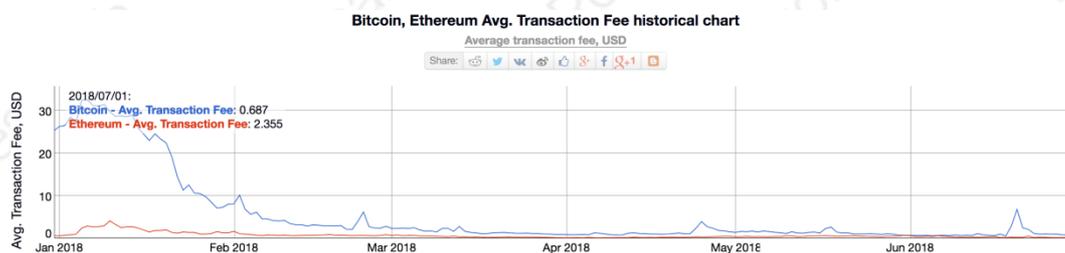

Figure 2.12: Unconfirmed Transaction in Ethereum

Source: etherscan.io

Transaction fees of Bitcoin decreased significantly and the transaction fees of Ethereum increased significantly this week. As of July 1st, 2018, average transaction fees of Bitcoin this week was 0.687USD, which is down 33.7% from last week. Average transaction fees of Ethereum this week was 2.355USD, an increase of 580% from last week.

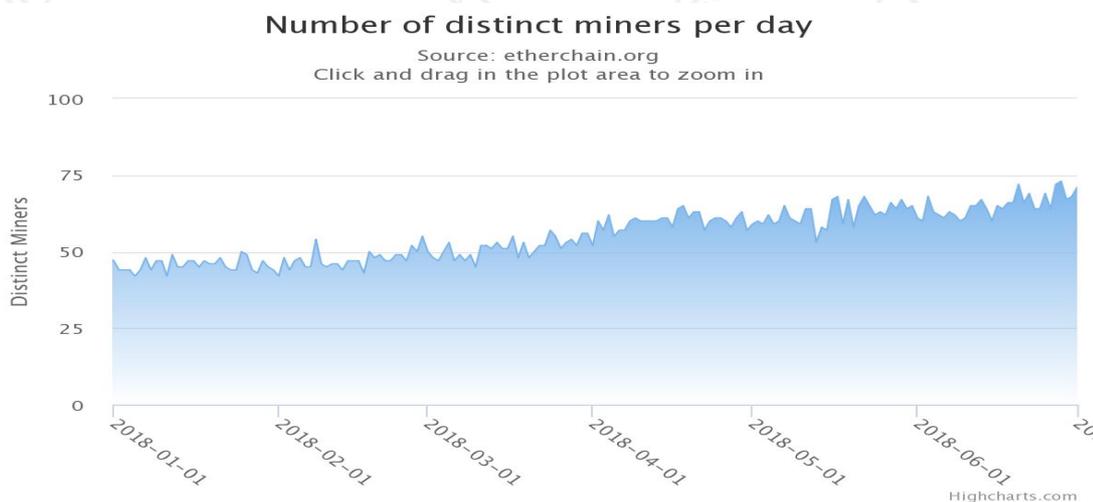

Figure 2.13: Bitcoin, Ethereum Average Transaction Fees

Source: bitinfocharts

The average number of distinct miners per day in Ethereum increased slightly. From June 25 to July 1st, 2018, the average number of distinct miners per day in Ethereum this week was 69.14, higher than last week (66.71) by 3.64%.

Figure 2.14: Number of Distinct Miners Per Day

Source: etherchain

The number of nodes in increased slightly for Bitcoin but decreased slightly for Ethereum. As of July 2nd, 2018, Bitcoin nodes reached 9926, an increase of 2.37% from last week, of which 2,450 nodes were in the U.S, 1772 nodes were in Germany, and 891 nodes were in China, accounting for 24.68%,

17.85% and 8.98% of the total number of nodes, respectively.

As of July 2nd, 2018, Ethereum nodes reached 15640, which was a decrease of 3.26% from the previous week. There were 6129 nodes in the U.S, 1993 nodes in China, accounting for 39.19%, 12.74% of the total number of nodes respectively.

2.3 Community Activity Statistics

The top three most popular cryptocurrencies on Facebook are Bitcoin, Ethereum, and Ripple in decreasing order. The top three most popular cryptocurrencies on Twitter are Ripple, Bitcoin and Ethereum in decreasing order. As of July 1, 2018, the number of fans on Twitter of Ripple (XRP), Bitcoin and Ethereum which has 915K, 880K, and 437K fans respectively.

As of July 2nd, Mainframe received the most attention on Telegram, with more than 100,000 fans. The fastest rising Telegram group, is INNOVATIVE BIORESEARCH ICO with more than 100,000 fans joining the telegram group within 24 hours.

2.4 Huobi Blockchain Big Data Weekly Insights

According to Huobi Blockchain Big Data Weekly Insights, Bitcoin, Bot and Coinbase are the hottest words of the week on Reddit. We performed NLP World Analysis on Reddit's r/CryptoCurrency Subreddit to understand the trending topics and overall sentiments, and we break down the keywords into three categories: Cryptocurrencies, Current Events, and Exchanges/Opinion Leaders.

In the Cryptocurrencies category, NLP Word Cloud suggests that, same as in 8btc.com, "Bitcoin", "EOS", and "Ethereum" are the three cryptocurrencies that received the most widespread attention. Discussions on Bitcoin and Ethereum were focusing on the same issues as in China, while discussions on EOS focused on 1. the fact that EOS nodes are built on centralized cloud servers such as AWS and Google Cloud; and 2. Whether the price of EOS has been too high.

In the Events category, NLP Word Cloud suggests "Bots", "Platform" and "Decentralized" as the three hottest words of the week. Specifically, "Bots" refers to whether using "Crypto Trading Bots" is profitable; Discussion on "Platform" focused on the possibility of building a decentralized freelance exchange to replace companies like Upwork; "Decentralized" refers to the discussion on whether EOS and Ripple are truly decentralized.

In the Exchanges/Opinion Leaders category, NLP Word Cloud suggests “Coinbase”, “Binance”, and “Bitfinex” as the three hottest words of the week. Specifically, discussion around “Coinbase” mainly focused on the name change from “GDAX” to “Coinbase Pro”; posts regarding “Bitfinex” mainly focused on the fact that Bitfinex Chief Strategy Officer Phil Potter has left the company.

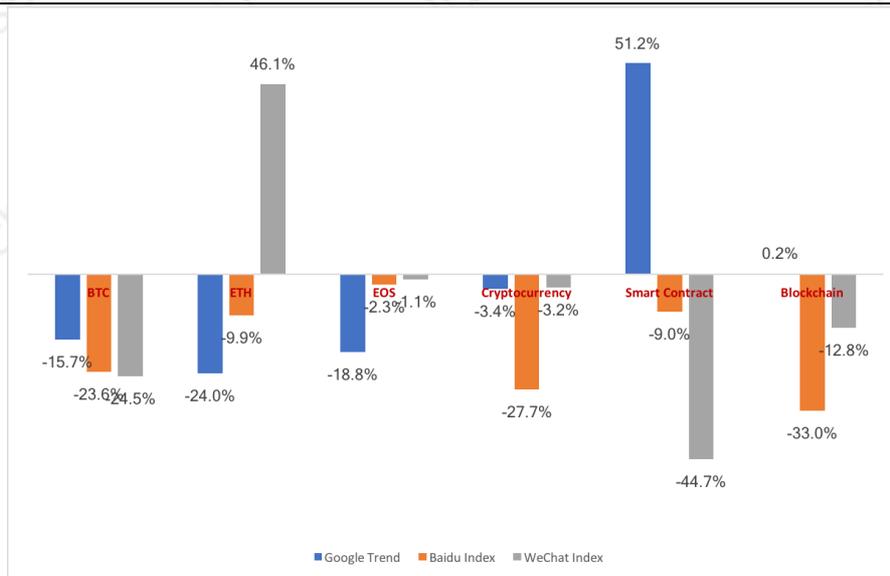

Figure 2.19: r/CryptoCurrency Word Cloud

Data Source: Huobi Research

This week, Search trends for cryptocurrencies in general experienced an apparent decrease from last week. However, there has been increase in searches of “ETH” on WeChat and “Smart Contract” on Google.

Figure 2.20: Weekly Changes in Search Trends

3. Weekly Blockchain News Review

3.1 Industrial Application

1. **EY Launches Blockchain Content Rights Platform in Partnership with Microsoft**

EY and Microsoft launched a Blockchain solution for content rights and royalty management. Aiming to streamline the costly and time-consuming processes in entertainment rights and royalties, the solution is first being deployed within gaming with Microsoft and its game publisher partners. Within this value chain – which can include authors, song writers, production houses, developers and more -- the intellectual property generates millions of transactions aggregating to billions of dollars per month in royalties to be paid. The royalty calculations along the value chain are currently mostly manual and generally managed via offline data sources

<https://www.ey.com/gl/en/newsroom/news-releases/news-ey-and-microsoft-launch-blockchain-solution-for-content-rights-and-royalties-management-for-media-and-entertainment-industry>

2. **Bank of England to Rebuild Settlement System to Interface with Blockchain Platforms**

The central bank has announced plans to overhaul its settlement system to allow private payment systems, including those based on Blockchains and other types of distributed ledgers, to interface with the platform. The revamped RTGS will allow private payment platforms to connect directly to the central bank's system — even for cross-border payments. He specifically stated that platforms using distributed ledger technology (DLT) — which includes, but is not limited to, Blockchains — will be able to connect to the bank's network.

<https://www.bankofengland.co.uk/-/media/boe/files/speech/2018/new-economy-new-finance-new-bank-speech-by-mark-carney.pdf?la=en&hash=F362C661810257FE779E3D5BCA17144EC65E8C63>

3. **Crypto-Friendly Brave Browser Adds Tor Option to Protect Privacy**

Brave, a privacy-focused browser that pays publishers with its BAT token, launched a new Tor feature in private tabs. Still in beta, the option allows users to connect to the Tor network for their browsing, which enables even stronger protection from tracking. The general downsides of Tor still apply, such as slow connections. However, the announcement states that Brave is "contributing back to the Tor network by running Tor relays." Adding relays expands bandwidth (speed) for the entire Tor network, not just Brave users.

<https://brave.com/tor-tabs-beta/>

3.2 International Policies

1. **Abu Dhabi Regulator Launches Crypto Regulations in Financial Free Zone**

Abu Dhabi Global Market (ADGM), the International Financial Centre in Abu Dhabi, has today launched its framework to regulate spot crypto asset activities,

including those undertaken by exchanges, custodians and other intermediaries in ADGM. The framework is designed to address the full range of risks associated with crypto asset activities, including risks relating to money laundering and financial crime, consumer protection, technology governance, custody and exchange operations. This new framework is one of ADGM's many efforts and ongoing commitment to bolster the economic diversification of Abu Dhabi through innovation and sustainable initiatives.

<https://www.adgm.com/mediacentre/press-releases/adgm-launches-crypto-asset-regulatory-framework/>

2. **Maltese Parliament Unanimously Approves 3 Bills on Cryptocurrency and Blockchain**

The Maltese Parliament voted unanimously to approve three cryptocurrencies and Blockchain bills. These bills that are designed to make Malta one of the most important and desirable locations in the Blockchain space should now facilitate the setting up of further companies in this sector. This Bill will also outline the duties and responsibilities of the Authority, one of the key roles being the certification of DLT platforms to ensure credibility and provide legal certainty to users wishing to make use of a DLT platform. The Malta Digital Innovation Authority Bill is the first bill which will give wide scope to the regulation of cryptocurrencies and the Blockchain space.

<https://www.ccn.com/exclusive-maltese-government-approves-three-cryptocurrency-bills/>

3. **Bahamas Will Pilot State-Backed Digital Currency**

The country's Deputy Prime Minister who also doubles up as Minister of Finance, K. Peter Turnquest, announced during the recently held 'The Bahamas Blockchain and Cryptocurrency Conference' that a pilot digital currency will be introduced by the Central Bank of the Bahamas. This comes in the wake of many commercial banks in the archipelagic state downsizing and leaving communities without vital banking services. With a central bank digital currency, the need to travel long distances to access these services would be reduced thus making life more convenient in a country where transportation is problematic and expensive, per Turnquest. The Deputy Prime Minister of the Bahamas also pointed out that a digital currency would improve the ease of doing business in the country.

http://www.jamaicaobserver.com/latestnews/Bahamas_to_introduce_digital_currency?profile=1373

4. **Cambodia Issues Warning Against Unlicensed Cryptocurrency Trading**

Authorities in Cambodia have formally warned domestic investors that they risk incurring penalties for buying, selling, or trading cryptocurrencies without getting a license first. The authorities also warned investors that dealing in cryptocurrencies could result in losses owing to the volatile nature of the assets. The authorities also warned investors that dealing in cryptocurrencies could result in losses owing to the volatile nature of the assets. Additionally, the General-Commissariat of National Police, the Securities and Exchange Commission of Cambodia, and the National Bank of Cambodia warned that protection mechanisms for customers were lacking.

https://www.nbc.org.kh/download_files/news_and_events/news_eng/5070Joint_statementNBC_SECC_POLICE_11_May_2018_english.pdf

5. South Korea Reviews Its Stance on Crypto to Become Blockchain Haven

Financial Services Commission (FSC), the main financial agency of South Korea, has revealed a new crypto regulatory framework and guidelines pertaining to anti-money laundering (AML) and Know Your Customer (KYC) requirements for crypto exchanges. In its new money laundering prevention guideline targeted at crypto exchanges, the FSC tightened existing regulations on transaction and user monitoring. The FSC requested the Korea Financial Intelligence Unit (KFIU), the national financial watchdog, to strictly oversee cryptocurrency transactions and user activity.

http://www.fsc.go.kr/info/ntc_news_view.jsp?bbsid=BBS0030&page=1&sch1=&sword=&r_url=&menu=7210100&chk=32549&no=32548

3.3 Technological Breakthrough

1. Mastercard Wins Patent for Anonymous Blockchain Transactions

Mastercard newly wins a patent which outlines a system that facilitates anonymous transactions over a blockchain network. According to Mastercard, the transparent nature of ordinary blockchain transactions is a hindrance to this technology's adoption for everyday payments. After receiving transaction details from a business, the processing server creates two hash values. The server first hashes the transaction details, then it creates a second hash value by combining the first hash with the secret value from the entity profile. The hash value can then be published to a blockchain or other type of distributed ledger to prove the integrity of transactions without revealing their specific details.

<http://appft.uspto.gov/netacgi/nph-Parser?Sect1=PTO1&Sect2=HITOFF&d=PG01&p=1&u=%2Fmetahtml%2FPTO%2Fsrchnum.html&r=1&f=G&l=50&s1=%2220180181953%22.PGNR.&OS=DN/20180181953&RS=DN/20180181953>

4. Weekly Project Progress in the Market

4.1 New ICOs this Week

There are overall 127 ICOs this week, with Blockchain platform projects being the most popular ICO category. Among 118 ICOs collected with country information, United States has seen 12 ICOs, the most in the week and accounting for 10.2% of all ICOs this week. UK, Singapore and Switzerland each has 9 ICOs this week, each accounting for 7.5% of all ICOs this week. Estonia, Australia and Cayman Islands each has 6 ICOs this week, accounting for 5.1% of all ICOs this week, with the rest 38 countries each has less than 4 projects. Judging from the project types, with all 127 projects being clearly categorized, there are Blockchain platform projects accounts for 26.7% of all ICOs this week, with Entertainment projects, Coin projects, Gambling projects, Tokenization projects and Business Service projects each accounting for 17.3%, 7.1%, 6.3%, 5.5%, 5.5%, and 5.5%, respectively.
