Abstract

Market cap and transaction volume of cryptocurrencies generally decreased this week, with 86 of the TOP100 cryptocurrencies decreased to varying degrees and 14 cryptocurrencies increased. On July 16th, the total market cap of the TOP100 cryptocurrencies decreased to 239.542 billion dollars, a 9.6% decrease from last week. A total of 4 new projects entered the TOP100. On July 16, Bitcoin's price was at \$6296.66, down 7.82% from last week, and Ethereum price was at \$438.55, down 11.07%. **HB10's price decreased by 8.09% this week.**

Bitcoin's average number of unconfirmed transactions per block and average block size both increased. For Ethereum, both average number of unconfirmed transactions per block and average block size also increased. Average number of unconfirmed transaction in Ethereum increased by 83.18%. Bitcoin's transaction fees slightly decreased, and Ethereum's transaction fees greatly increased. The 7-day number of unconfirmed transactions for Bitcoin and Ethereum are 3854 and 41774, respectively. Bitcoin's Hashrate decreased by 3.44% and Ethereum's decreased by 1.31%. The average transaction fees on the Bitcoin and Ethereum network this week were \$0.602 and \$3.482, decreasing 1.31% and increasing 226% respectively. Total number of addresses on the Bitcoin and Ethereum network reached 26.27 million and 40.97 million, respectively.

The most active group on GitHub was ZSC; the team had 120 commits in the past week. Mainframe was the most popular group on Telegram. In terms of community activity, Bitcoin, Ethereum, and Ripple remained as the most popular communities on Facebook and Twitter. uChain attracted the most fans in the last 24 hours.

According to <Huobi Data Analytics Weekly>, Bitcoin, Bot and Binance were the hottest words on r/CryptoCurrency this week. Among the top three search engines (Google, Baidu, WeChat), popular topics regarding Cryptocurrencies and Blockchain increased while that of Blockchain decreased in popularity compared to last week.

The United Kingdom had the most ICOs this week, with Finance projects being the most popular ICO project category. Among all 61 projects, most of them took place in the UK. Application projects were the majority, among them finance projects account for the largest proportion. There were 17 investment activities took place in the Blockchain industry this week. The investment trend has changed significantly from last week, and Blockchain game projects has great popularity.

1. Weekly Market Review

1.1 Market overview

This week, the overall market capitalization for the TOP100 cryptocurrencies increased, with 86 projects increasing and 14 projects declining to varying degrees. According to coinmarketcap, as of July 16, 2018, the total market cap of the TOP100 cryptocurrencies was 239.542 billion U.S. dollars, a decrease of 9.60% from last week. On the other hand, BAT had the largest increase of 20.57%, bringing its rank up to No.38. OMG had the second largest increase of 13.48%, and its market cap ranking remained the same. In addition, there were 4 projects that entered TOP100, NULS(increasing 3.20%, ranking up 14 places), PAYX (decreasing 0.15%, ranking up 11 places), GTO (decreasing 2.65%, ranking up 15 places), ZEN (decreasing 7.61%, ranking up 9 places). The highest increase in price this week was WAX, ranking up by 17 to NO.76. The largest increase in price this week was BAT, increasing by 20.57%. The largest decrease in price was BNT, decreasing by 34.15%. As of July 16th, 2018, Bitcoin was traded at 6296.66 USD, 7.82% lower than its price last week. Ethereum was traded at 438.55 USD, 11.07% lower than its price last week.

Table 1.1: Top Five Price Increases and Decreases

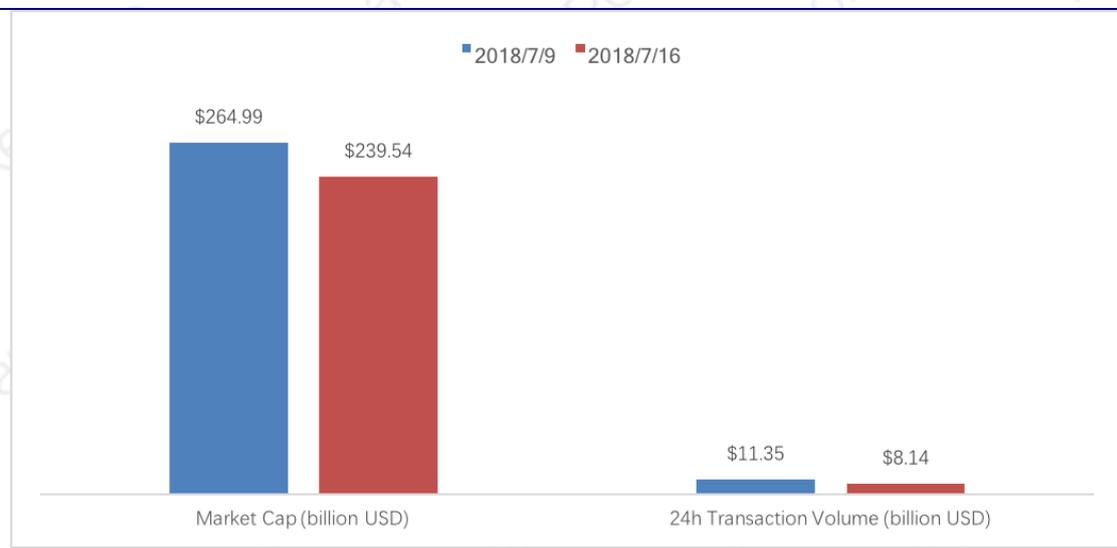

Symbol	Price decrease	Symbol	Price increase
BNT	-34.15%	BAT	20.57%
NAS	-30.07%	KCS	10.60%
BCD	-29.64%	MITH	6.64%
ELA	-28.71%	MOAC	4.95%
ONT	-27.21%	ZRX	4.76%

The overall 24h trading volume decreased this week, with a decrease of 28.29% compared with last week. Overall, the 24h trading volume decreased by 28.29% compared with the same period of last week. In this week, 6 projects of the TOP100 project increased by more than 100% in 24h trading volume, of which the highest was GTO with an increase of 1013.59%, followed by POWR with an increase of 357.19% compared to last week. This week, there were 81 projects that saw a decrease in trading

volume. 28 projects fell more than 50%, of which the lowest was BCD, a drop of 95.30%.

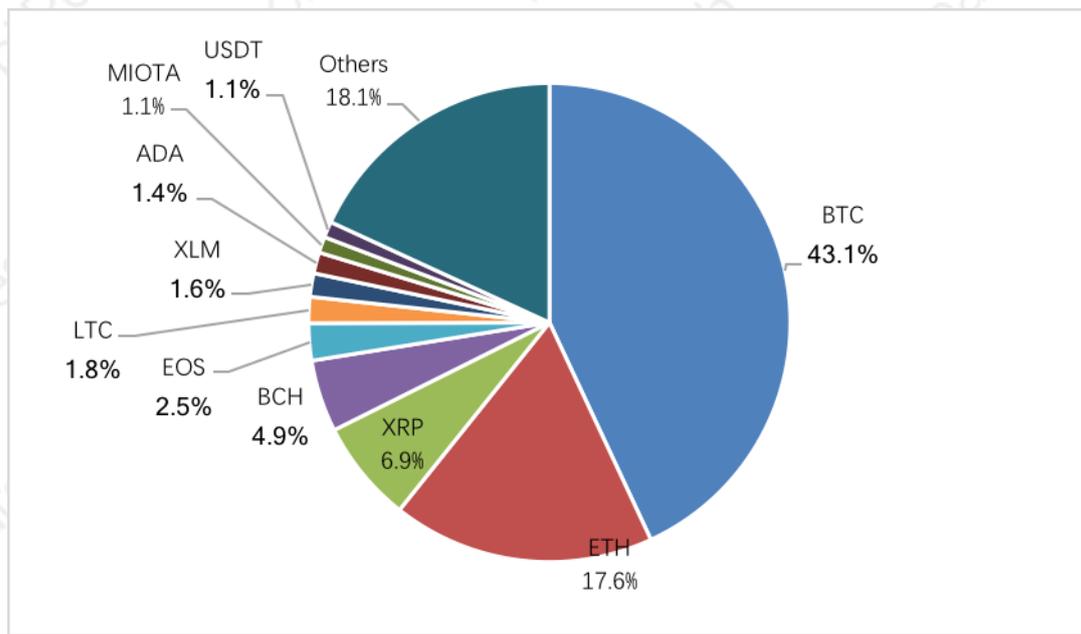

Figure 1.1: The Market cap and 24-hour Trading Volume for TOP100 cryptocurrencies

Source: coinmarketcap

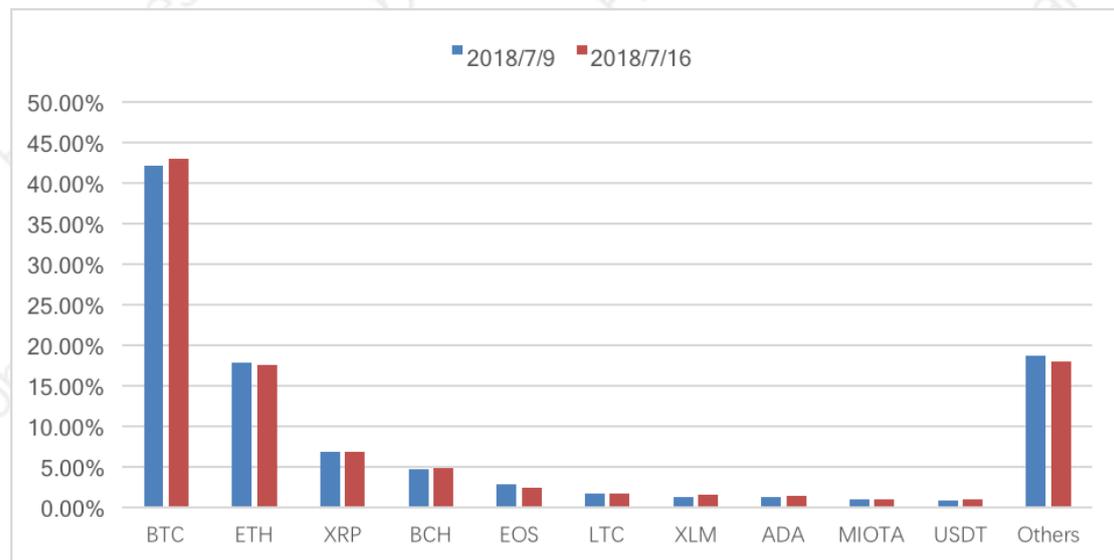

The TOP10 cryptocurrencies' market share distribution remained stable, but the 80% of market caps has increased to varying degrees. On July 16, the overall market cap of the TOP10 cryptocurrencies was 205.295 billion USD, a decrease of 9.04% from last week, accounting for 81.90% of the total market capitalization of cryptocurrencies, maintaining a stable market share compared to last week. USDT's market capitalization had the largest increase of 3.31%. EOS had the largest decrease of 22.26%. BTC's market share was 42.13%, a slight increase of 0.95% compared to last week.

1.2 Segment Analysis

The market cap of platform projects decreased the most and average market cap of application projects decreased the most. As of July 16th, 2018, the total market cap of platform class reached 66.824 billion USD,

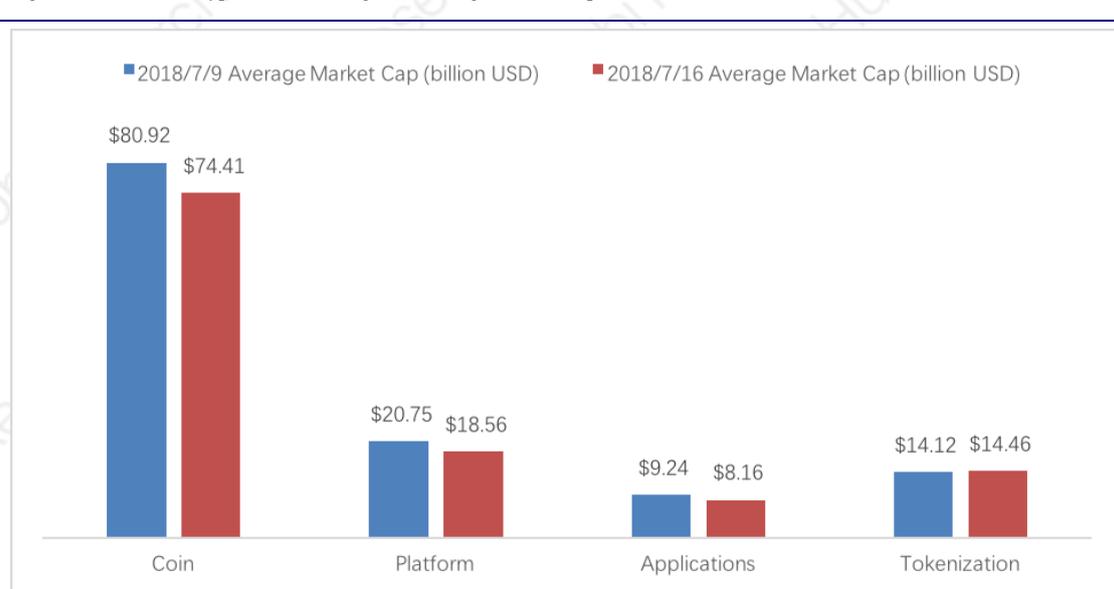

experiencing a decrease of 12.95% compared to last week, which is the biggest increase among all class. In addition, the average market cap for application projects this week was 0.816 billion US dollars, a decrease of 11.76% compared to last week.

Figure 1.4: TOP100 Cryptocurrencies Market Segment Capitalization

Source: coinmarketcap

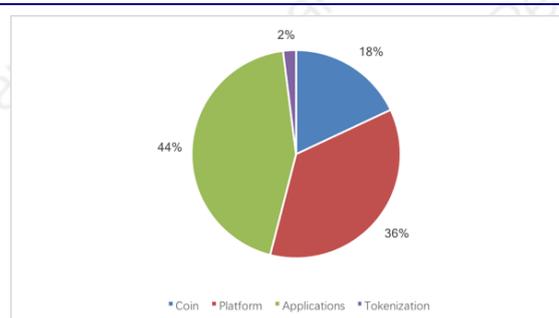

Figure 1.5: TOP100 Cryptocurrencies Segment Average Market Cap

Source: coinmarketcap

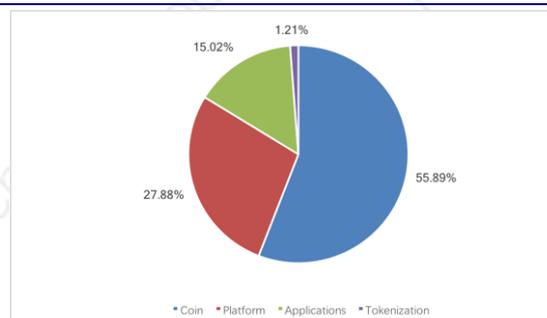

The market segment distribution of the TOP100 cryptocurrencies remained stable. As of July 16, 2018, the proportion of the market segments has remained stable among the TOP100 compared to last week. The number of platform projects decreased by 1, the number of app projects increased by 1, coin and asset-backed token projects remained stable. The largest overall market cap by segment is still coin projects, accounting for 55.91%, remaining stable compared to last week.

Source: coinmarketcap

Note: According to the different attributes of cryptocurrencies, Huobi Research will divide them into four categories: Coin, Application, Platform and Tokenization.

Coin: The coin category refers to cryptocurrencies that aim to solve the problems of modern day fiat currencies, providing benefits like decentralization, improved safety, lower transaction fees, and faster confirmation speeds. The most popular coin cryptocurrency is Bitcoin. The value of coin cryptocurrencies lies in its ability to act as a medium of exchange.

Blockchain Platform: The Blockchain platform category refers to Blockchain projects that provide a platform upon which developers can create applications using the underlying Blockchain. Applications can utilize the platform's Blockchain without needing to create one themselves. Blockchain platform assets grant the right to use and participate in the platform.

Blockchain Application: The Blockchain application category refers to Blockchain projects that have specific use cases. These could either utilize their own Blockchain, or exist on a Blockchain platform as a "dApp". Blockchain application assets grant the right to use and participate in its use cases, and its value lies in the application's ability to perform its function.

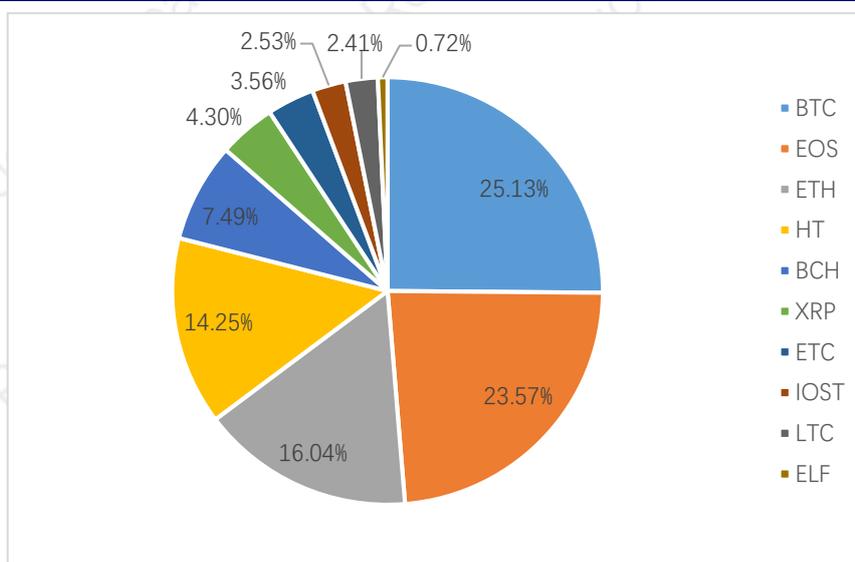

Tokenization: The tokenization category refers to Blockchain projects that is linked to actual assets like gold or USD. The most popular tokenization project is Tether. The value of a tokenization asset lies in the value of the

underlying physical assets.

1.3 HB10 Index

The Huobi Power Index (HUOBI 10) rose 8.09% this week. According to the platform data of the Huobi Global Exchange, as of early morning of July 16, 2018, the index was 773.61, comparing to 841.7 at the same time last week, a decrease of 8.09% in the 7-day period; the highest level was 844.87 in the middle of the week and the lowest was 701.94.

Figure 1.8: HB10 Cryptocurrencies Segment Ratio

Source: Huobi global exchange platform, Huobi Research

Note: Huobi10 is composed of 10 currencies with large scale and good liquidity in Huobi Pro, which can comprehensively reflect the overall performance of the market. The index sample space is all USDT transaction currencies for the online transaction of Huobi Pro, which is composed of three types of assets: "currency", "platform" and "application" according to the different attributes of the Blockchain assets. We calculate the weight of the constituent currency using the weight of the composite price index formula every 15 seconds.

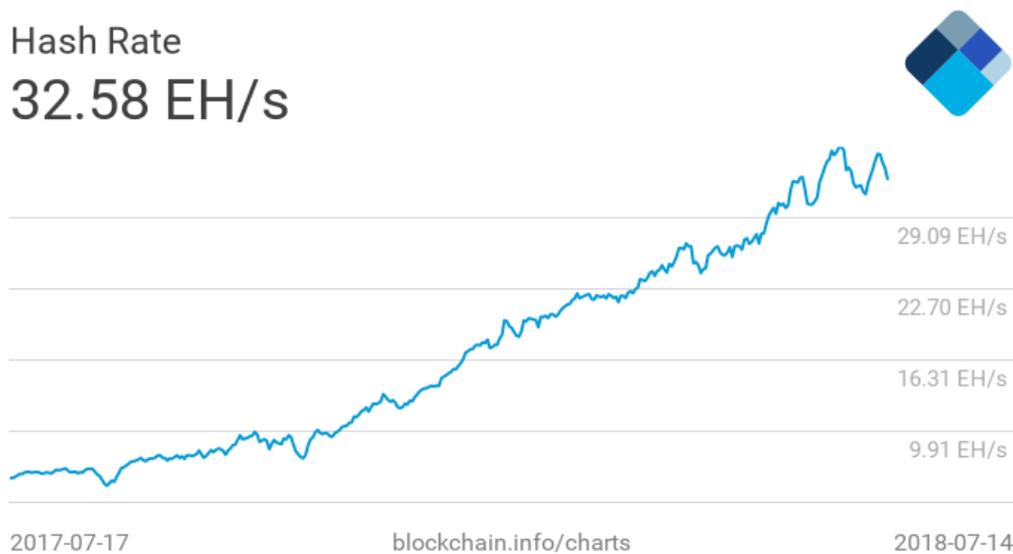

2. Technical Statistics

2.1 Cryptocurrency Mining Statistics

Hashrate of Bitcoin and Ethereum increased this week. From July 9th to July 15th, 2018, the average bitcoin Hashrate for the entire network reached 32.58 EH/s, a decrease of 3.44% from the previous week.

Average Hashrate for the entire Ethereum network was 276.842 TH/S this week, an increase of 1.31% from the previous week.

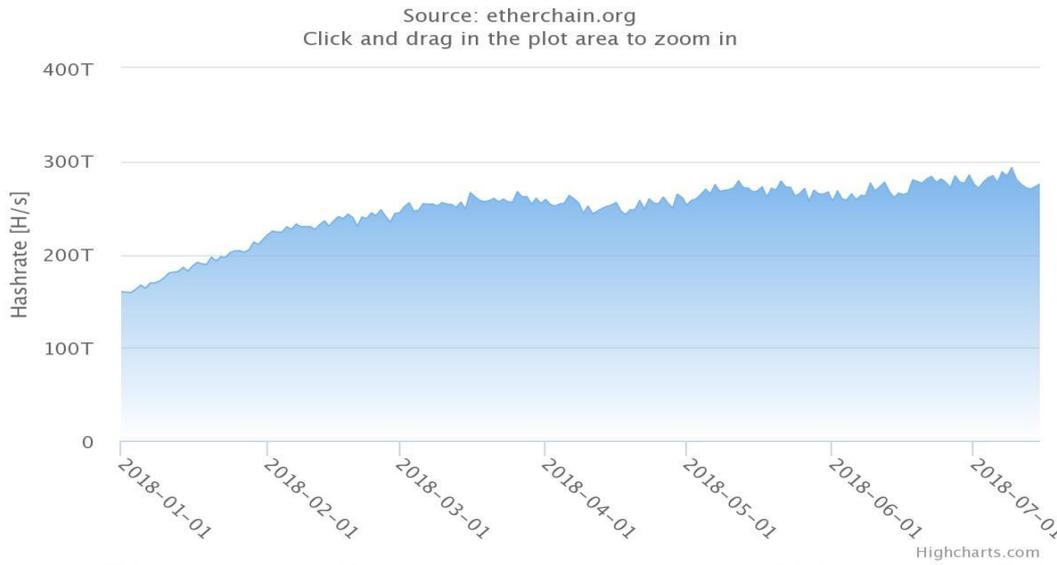

Figure 2.1: Bitcoin Hashrate Changes

Source: blockchain.info

Figure 2.2: Ethereum Hashrate Changes

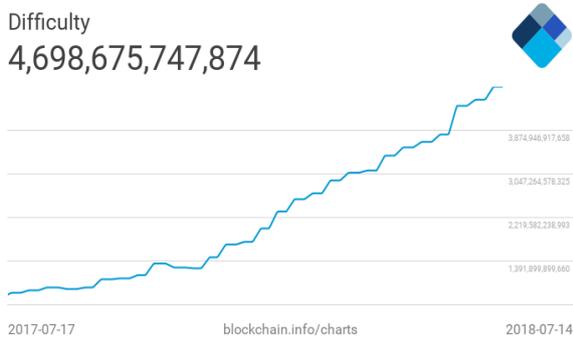

Average hashrate of the Ethereum Network

Source: etherchain

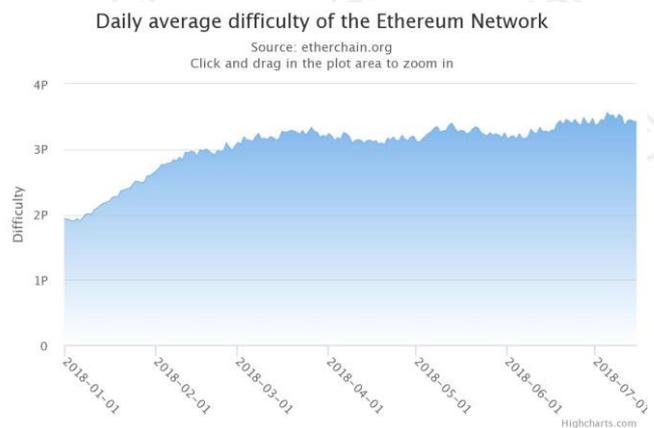

This week, the difficulty of mining in Bitcoin and Ethereum has slightly increased and decreased respectively. At July 15th, 2018, Average difficulty for mining Bitcoin this week was 4.69T, remained stable compared with the previous week. The average difficulty of mining Ethereum this week was 3.445P, a decrease of 0.73% compared with the previous week.

Figure 2.3: The Difficulty of Mining in Bitcoin

Source: blockchain.info

Figure 2.4: The Difficulty of Mining in Ethereum

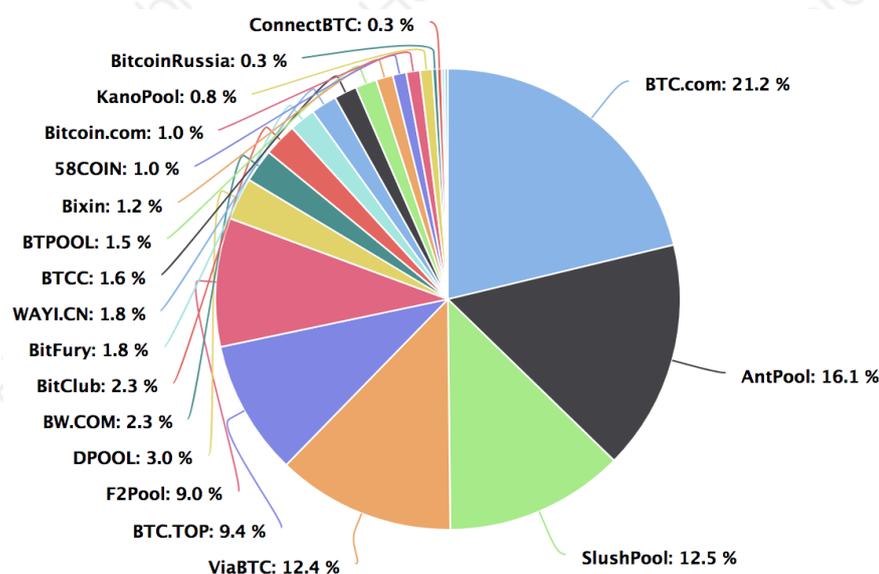

Source: etherchain

The percentage of BTC.com in the overall mining pool market slightly

decreased, with **BTC.TOP** entering **Top 5**. The overall distribution of the **Ethereum mining pools** remained stable. From July 8th to July 15th, 2018, Bitcoin mined 976 blocks in the past week, a decrease of 1.02% from the previous week. Among the top five pools were BTC.com, AntPool, SlushPool, ViaBTC and BTC.TOP. Those 5 pools mined 200, 152, 118, 117 and 89 respectively, accounting for 20.49%、15.57%、12.09%、11.99% and 9.12%. The Hashrates were 7.64EH/s, 5.8EH/s, 4.51EH/s, 4.47EH/s and 3.4EH/s respectively.

In the past week, Ethereum's entire network mined 41587 blocks, which was an increase of 2.79% from the previous week. The top five pools are Ethermine, SparkPool, f2pool_2, Nanopool, and miningpoolhub_1, which mined 11726, 6845, 6410, 5031, and 4168 blocks respectively, accounting for 28.19%, 16.45%, 15.41%, 12.09%, and 10.02% respectively.

2.2 Activity Statistics

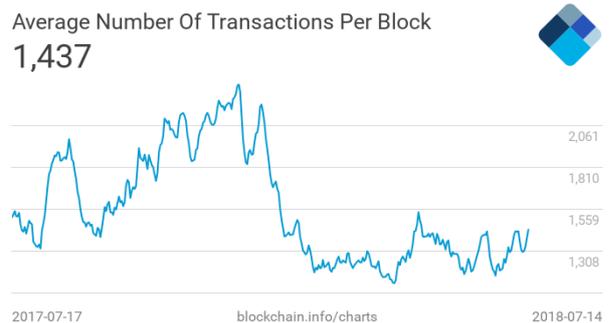

Bitcoin’s block size increased and the average number of transactions per block increased. Average number of transaction and block size both increased for Ethereum. According to blockchain.info, from July 9 to July 15, 2018, the average number of transactions per block on Bitcoin was 1437, an increase of 8.78% from last week. The average size of each block was 1054.72Kbs, an increase of 36.04% from last week.

Figure 2.7: Block Size of Bitcoin

Figure 2.8: The Average Transactions of Per Block in Bitcoin

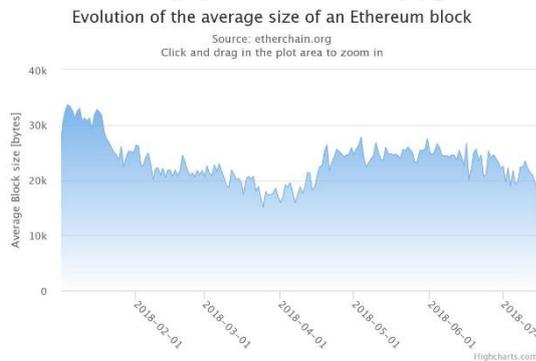

Source: blockchain.info

According to etherchain, the average number of transactions per block in Ethereum this week was 98.3, an 11.5% increase compared with the previous week. The average size of each block was 21207 bytes, which was

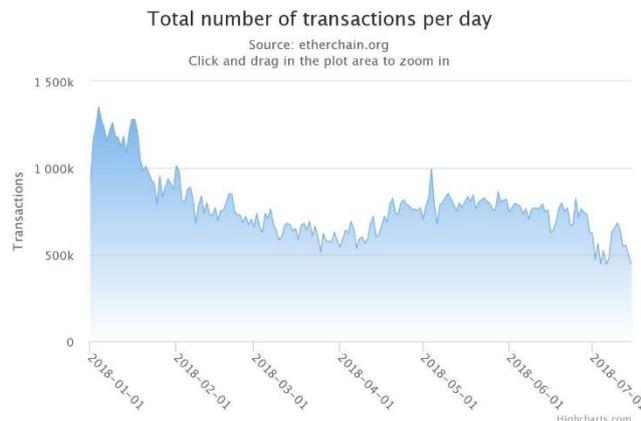

a increase of 3.2% compared to last week.

Figure 2.9: Evolution of the average size of an Ethereum block

Source: etherchain

Figure 2.10: The number of transactions per day

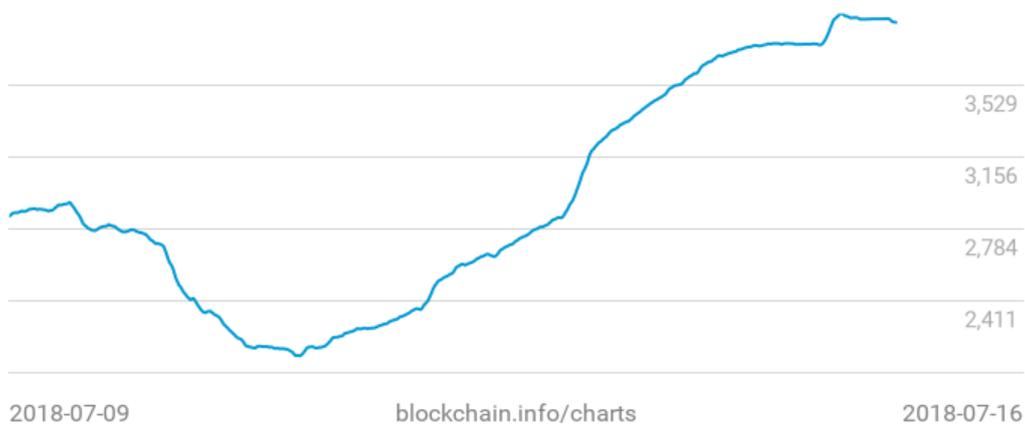

Source: etherscan.io

Number of unconfirmed transactions in Bitcoin and Ethereum increased 35.03% and 83.18% respectively comparing to last week. As of July 15th, 2018, the number of 7-day average unconfirmed transactions in Bitcoin network was 3854, a decrease of 35.03% from last week. As of July 16th, the number of unconfirmed transactions in Ethereum network this week was 41774, a big increase of 83.18% from last week. The lowest amount of unconfirmed transactions this week was 292 and the highest amount reached 62715.

Figure 2.11: Unconfirmed Transaction in Bitcoin

The average number of distinct miners per day in Ethereum decreased slightly. From July 9th to July 15th, 2018, the average number of distinct miners per day in Ethereum this week was 66, higher than last week (69.42) by 5%.

Figure 2.14: Number of Distinct Miners Per Day

Source: etherchain

The number of nodes decreased slightly for Bitcoin and Ethereum. As of July 16th, 2018, Bitcoin nodes reached 9441, a decrease of 3% from last week, of which 2,375 nodes were in the U.S, 1735 nodes were in Germany,

and 907 nodes were in China, accounting for 25.16%, 18.38% and 9.61% of the total number of nodes, respectively.

As of July 16th, 2018, Ethereum nodes reached 15621, which was a decrease of 3.38% from the previous week. There were 6176 nodes in the U.S, 2386 nodes in China, 1116 nodes in Canada accounting for 39.54%, 15.27%, 7.14% of the total number of nodes respectively.

Table 2.1: Bitcoin Node Ranking by Country

RANK	COUNTRY	NODES
1	United States	2375 (25.16%)
2	Germany	1735 (18.38%)

2.3 Community Activity Statistics

The top three most popular cryptocurrencies on Facebook are Bitcoin, Ethereum, and Ripple in decreasing order, with 475K, 150K and 138K fans respectively. The top three most popular cryptocurrencies on Twitter are Ripple, Bitcoin and Ethereum in decreasing order. As of July 1, 2018, the number of fans on Twitter of Ripple (XRP), Bitcoin and Ethereum which has 914K, 879K, and 438K fans respectively.

As of July 16th, MainFrame received the most attention on Telegram, with more than 100,000 fans. The fastest rising Telegram group, is UChain with more than 40,000 fans joining the telegram group within 24 hours.

Table 2.3: Facebook Cryptocurrency Fans Ranking

2.4 Huobi Blockchain Big Data Weekly Insights

According to Huobi Blockchain Big Data Weekly Insights, **Bitcoin, Bot and Binance** are the hottest words of the week on r/CryptoCurrency. We performed NLP Word Analysis on Reddit's r/CryptoCurrency Subreddit to understand the trending topics and overall sentiments overseas, and we similarly broke down the keywords into three categories: Cryptocurrencies, Events, and Exchanges/Opinion Leaders.

In the Cryptocurrencies category, NLP Word Cloud suggests that, same as in 8btc.com, **"Bitcoin"**, **"Ethereum"**, and **"IOTA"** are the three cryptocurrencies that received the most widespread attention. **Discussions on Bitcoin and Ethereum were focusing on the same issues as in China, while discussions on IOTA focused on the future of DAG technology.** One of the top trending articles analyzed how DAG has been applied to facilitate the development of Raspberry Pi.

In the Events category, NLP Word Cloud suggests **"Bots"**, **"Decentralized"** and **"Scam"** as the three hottest words of the week. Specifically, **"Bots"** refers to whether using "Crypto Trading Bots" is profitable; Discussion on **"Decentralized"** focused on the recent decentralized exchanges as well as decentralized sport betting and gambling platforms; **"Scam"** refers to the

discussion on 1. Whether Fcoin's design is a Ponzi Scheme; and 2. The Indian government has just cracked down on a group of Bitcoin scammers.

In the Exchanges/Opinion Leaders category, NLP Word Cloud suggests **“Binance”**, **“Bitfinex”**, and **“Coinbase”** as the three hottest words of the week. They received the most attention mainly because they are the biggest foreign Cryptocurrency exchanges. It is worth to note that Fcoin has received tons of interest on Reddit, with people debating whether Fcoin's business plan and token design is actually feasible.

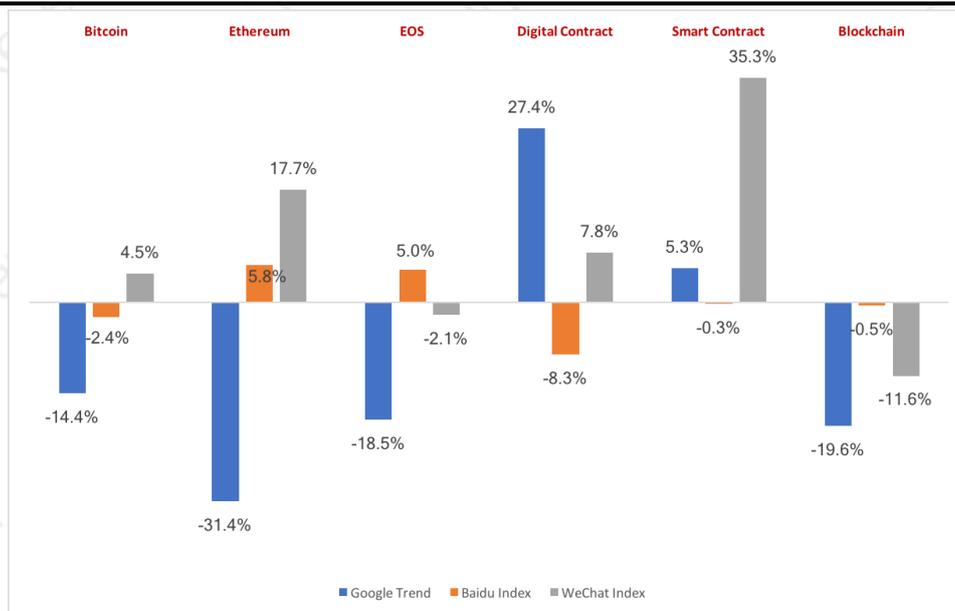

Figure 2.19: r/CryptoCurrency Word Cloud

Data Source: Huobi Research

This week, search trends for “Bitcoin”, “Ethereum”, “EOS”, “Blockchain” experienced a decrease, while search trends for “Cryptocurrency” and “Smart Contract” experienced an increase on Google. Baidu Index for these key words have been similar compared to last week. For WeChat Index, only “Blockchain” and “EOS” has experienced decrease in its trend performance.

Figure 2.20: Weekly Changes in Search Trends

3. Weekly Blockchain News Review

3.1 Industrial Application

1. Samsung Integrates Blockchain and AI in Cello 3.0 Logistics Platform

CelloSquare 3.0 utilizes artificial intelligence (AI) and SDS's "logistics knowledge" technology. The company explained that the CelloSquare 3.0 can prove the origin of international goods and improve the reliability of the product by using Blockchain technology, which cannot be modified or stolen. Additionally, the platform can automatically select and provide the best shipping and delivery methods to reduce delivery time and costs.

<https://www.samsungcentral.com/2018/06/20/samsung-sds-launches-an-online-logistics-platform-made-with-blockchain-and-ai/>

2. Medicalchain Partners with Mayo Clinic to Explore Blockchain

Mayo Clinic will provide their world-class healthcare and health IT expertise, while Medicalchain will provide their knowledge of Blockchain and crypto. They are going to work on several use cases using Blockchain based electronic health records.

<https://medium.com/medicalchain/medicalchain-announces-joint-working-agreement-with-mayo-clinic-9cfb474dcf0f>

3. Delaware Signs \$738,000 Corporate Blockchain Filing System Contract with IBM

Delaware Awards IBM \$738,000 Contract to Develop Prototype Blockchain Filing System, which will be based on the Hyperledger Fabric Blockchain

framework. IBM plans to launch a proof-of-concept to in October 2018. The aim of the contract is to establish the various areas that Blockchain technology can assist businesses registered in Delaware, allowing corporations to take advantage of smart contract technology to automatically track stocks and collateral assets in real time

<https://www.ccn.com/delaware-awards-ibm-738000-contract-to-develop-prototype-blockchain-filing-system/>

3.2 International Policies

1. South Korea's FSC Reveals Stricter Crypto Exchange KYC/AML Regulation Framework

The Korea Financial Services Commission revised AML and KYC Guidelines, which will be implemented on July 10, 2018. The new standard states that cryptocurrency exchanges must conduct customer due diligence (CDD) and enhance customer identification (EDD) to ensure that the user's trading objectives and funding sources are legal.

<http://www.fsc.go.kr/downManager?bbsid=BBS0048&no=127357>

2. Japanese Financial Regulator to Change Cryptocurrency Exchange Regulations

The Financial Services Authority of Japan is considering to change the legal basis for regulating cryptocurrencies. FSA has the intention to modify cryptocurrency regulation from the current Payment Services Act (PSA) to the Financial Instruments and Exchange Act (FIEA), which will consider crypto as a financial product. FIEA will also open up the possibility of introducing cryptocurrency derivatives such as exchange-traded funds (ETFs).

<https://coinfrenzy.io/japanese-financial-change-cryptocurrency-exchange-regulations/>

3. FINRA Requests Firms to Report Digital Asset Holdings

FINRA is monitoring developments in the digital asset marketplace and is undertaking efforts to ascertain the extent of FINRA member involvement related to digital assets. To supplement FINRA's efforts to date, FINRA issued Notice to encourage each firm to promptly notify FINRA if it, or its associated persons or affiliates, currently engages, or intends to engage, in any activities related to digital assets, such as cryptocurrencies and other virtual coins and tokens.

<http://www.finra.org/industry/notices/18-20>

3.3 Technological Breakthrough

1. R3 Corda Enterprise Launches 'Blockchain Firewall' for Enterprises

Corda Enterprise is a commercial distribution of Corda, an open source Blockchain platform, specifically optimized to meet the demands of modern day business. Corda Enterprise can be deployed inside corporate data centers while retaining the ability to communicate securely with other nodes anywhere else in the world. Server databases facilitates seamless integration with industry-standard enterprise databases, such as Oracle and SQL, with 24/7 support.

4. Weekly Project Progress in the Market

4.1 New ICOs this Week

There were overall 61 ICOs this week; UK was the country with the most ICOs this week, and the most popular project type is Blockchain application projects. Among 57 ICOs collected with country information, UK was the country with the most ICOs (8) this week, accounting for 13.6% of all ICOs this week. USA, Singapore, and Cayman Islands each has 6 ICOs this week, accounting for 10.2% of all ICOs respectively. Australia and Germany each has 4 and 3 ICOs this week, and the other countries generally had 1-2 ICOs this week. Judging by the project types, with all 61 projects have been clearly categorized, there were 34 Blockchain application projects, accounting for 55.7% of all ICOs this week.

Name	Country	Introduction	Category	ICO Date	ICO Price
MulTra (MTT)	Germany	The MulTra News App pays readers for reading news. MulTra Tokens ensure news content monetization. The MulTra News App is a blockchain-powered news aggregator that uses AI to consolidate news based on readers' interests into an all-in-one, personalized experience. Mass adoption of MulTra Token is ensured because it's the first cryptocurrency for millions of people entering the crypto world for the first time by simply reading news.	Application	July 9	0.0696 USD
EvoChain (ECHO Token)	USA	Mutual gain is the philosophy of EvoChain's development process. Rather than a design model centered around an antagonistic mindset that puts crypto in the crosshairs of big banks, we've decided through careful reasoning that the best approach moving forward for all cryptocurrency is one that incorporates everyone's interests and presents a mutual benefit to all parties involved.	Application	July 9	4000 ECHO = 1 ETH
