# Huobi Blockchain Big Data Weekly

## Insights Vol. 9

2018/8/1-2018/8/8

---

### Abstract

All data in this report was captured and analyzed by Huobi Research; please cite the source “Huobi Blockchain Big Data” for reference.

- **On-Blockchain Data:**

This week, the number of active Bitcoin addresses decreased from 3.51 to 3.45 million, of which the number of new addresses decreased from 1.41 to 1.34 million, and the number of reactivated addresses increased slightly to 1.49 million. There were 1 extra-large transaction of 13,376 BTC on BTC network this week. The number of BTC transactions worth between 1,000-10,000 BTC increased from 398 to 1188, while the total volume these transactions accounted for 32.9% of the overall BTC transaction volume this week. There were four top 30 Bitcoin addresses with significant change in their respective balances, all of which were net BTC inflows.

The number of active address in ETH decreased 13.8% from 1.75 to 1.51 million. The overall transaction fee increased from 8948.3 ETH to 11589.3 ETH, and the average transaction fee increased 35.2% to 0.0023 ETH this week. Concentration of wealth on ETH network increased slightly. There was one extra-large transaction on ETH network this week. The transaction volume for extra-large transactions, larg transactions and other transactions all received decrease to various degrees.

- **Social Media Data:**

BTC, ETH, and EOS continued to be the top trending Cryptocurrencies in China, while BTC, ETH, and IOTA were top trending cryptocurrencies overseas. In the Events category, “Risk”, “Online” and “Ecosystem” were the hottest words in China, while “Bot”, “ETF” and “Technology” were the hottest words overseas; in the Exchange and KOL category, “Huobi”, “OKEX” and “Fcoin” were the hottest in China, while “Coinbase”, “Binance” and “McAfee” were the hottest overseas.

BTC, ETH and TRX were the top Cryptocurrencies projects that received the most stars and watchers in a week; ETH, BTC and EOS were the projects that received the most forks in a week; ETH, TRX and EOS were the projects with the most commits this week.

- **Market Trading Data:**

The price of top 10 Cryptocurrencies except for ETC experienced decrease to various degrees, with IOTA receiving the largest decrease of 23.8% and ETC receiving the largest increase of 3.5% in their respective prices. In terms of price volatility, BTC had the lowest volatility rate of 0.0025 s.d. while IOTA had the largest volatility rate of 0.0092 s.d. The turnovers of top 10 Cryptocurrencies had been similar to last week, except for ETC whose turnover has increased almost 200%. BTC/Stellar, BTC/BCH had the highest correlation in price, while ETC/BTC and ETC/Stellar had the lowest correlation in price this week.

## 1. On-Blockchain Data

### 1.1 Active Bitcoin Addresses

**This week, the number of active Bitcoin addresses slightly decreased from 3.51 million to 3.45 million.**

Figure 1: Active Bitcoin Addresses (in thousands)

Data Source: Blockchain Node File, Huobi Research

**This week, the number of new address has decreased from 1.41 million to 1.34 million, ending the four-week losing streak; the number of continuously active address has increased from 0.62 million to 0.63 million, accounting for 18.3% of all active BTC addresses this week (17.7% last week); the number of reactivated addresses (1.49 million) was similar to that of last week.**

Figure 2: Categorization of Active Bitcoin Address (in thousands)

Data Source: Blockchain Node File, Huobi Research

## 1.2 Transactions on Bitcoin Network

The overall transaction volume on the Bitcoin network was **7.20 million BTC**, increased **21.5%** from **5.92 million BTC** last week. There were overall 1.51 million transactions this week, slightly decreased from 1.54 million transactions last week. The average trading volume per transaction on the Bitcoin network has **increased by 23.95%** from 3.84 to 4.76 BTC in a week.

Figure 3.1: Bitcoin Trading Volume (thousand BTC)

Data Source: Blockchain Node File, Huobi Research

Figure 3.2: Number of Transactions on BTC (in thousands)

Data Source: Blockchain Node File, Huobi Research

### 1.3 Bitcoin TPS

The average bitcoin transaction per second (TPS) this week decreased slightly to 2.5, ending the six-week winning streak.

Figure 4: Bitcoin TPS

Data Source: Blockchain Node File, Huobi Research

### 1.4 Bitcoin Transaction Fee

The overall transaction fee on the Bitcoin network slightly decreased from 154 to 136.9 BTC this week. **The average transaction fee was 0.00009 BTC, decreased slightly from last week.**

Figure 5: Bitcoin Transaction Fee (BTC)

Data Source: Blockchain Node File, Huobi Research

### 1.5 Concentration of Wealth on Bitcoin Network

**Concentration of Wealth on Bitcoin Network has drastically increased compared to last week.** The top 10 addresses held 6.08% of all Bitcoins, increased 0.12% than last week; top 10-1000 addresses held 13.12% of all Bitcoins, similar to last week; top 100-1000 addresses held 16.60% of all Bitcoins, similar to last week; all other addresses held 64.21% of all Bitcoins, decreased 0.07% from last week.

Figure 6: Concentration of Wealth on BTC Network

Data Source: Blockchain Node File, Huobi Research

### 1.6 BTC Large Transactions Monitor

Huobi Research defines “extra-large transactions” as individual transactions worth over 10,000 BTC, and “large transactions” as those worth between 1,000-10,000 BTC. This week, **there were one extra-large transaction of 13,376 BTC on Bitcoin network. The number of large transactions increased from 398 last week to 1188 this week.**

Figure 7: Large and Extra-large Transactions on BTC Network

Data Source: Blockchain Node File, Huobi Research

### 1.7 Transaction Volume Distribution of Bitcoin

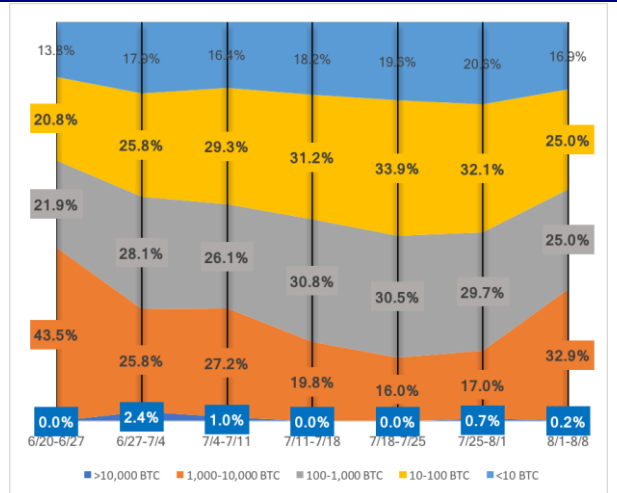

There was a drastic increase in overall volume for transactions worth between 1,000-10,000 BTC from 1.01 million BTC to 2.37 million BTC this week, accounting for 32.9% of the total BTC transaction volume this week (compared to 17% last week).

Figure 8.1: Transaction Breakdown by Volume (in thousands)

Figure 8.2: Weekly BTC Transaction Distribution

Data Source: Blockchain Node File, Huobi Research

Data Source: Blockchain Node File, Huobi Research

### 1.8 Change in Balance of Top 30 Bitcoin Addresses

This week, among the Top 30 Bitcoin addresses, 4 addresses had significant changes in their balance, all of which were net BTC inflows. The address with the most Bitcoin, a cold wallet of Bitfinex, received 2,876 BTC this week; the address with the second-to-most Bitcoin, a cold wallet of Binance, received 10,012 BTC this week; the address with the third-to-most Bitcoin, a cold wallet of Bitstamp, received 8,000 this week.

Data Source: Blockchain Node File, Huobi Research

### 1.9 Active Ethereum Addresses

The number of active addresses in Ethereum has decreased by 13.8% from 1.75 million to 1.51 million this week.

Figure 10: Number of Active Ethereum Addresses (in millions)

Data Source: Blockchain Node File, Huobi Research

## 1.10 Transactions on Ethereum Network

The overall transaction volume on the Ethereum network has decreased by 14.9% to 8.91 million ETHs this week. Number of transactions on the Ethereum network this week has decreased by 3.2% to 5.05 million this week. The average transaction volume this week was 1.76 ETH, down 11.8% from last week.

Figure 11.1: Overall Trading Volume on ETH (million ETH)

Figure 11.2: Number of Transactions on ETH (in millions)

Data Source: Blockchain Node File, Huobi Research

Data Source: Blockchain Node File, Huobi Research

## 1.11 Ethereum TPS

The average transaction per second (TPS) on Ethereum network this week decreased slightly to 8.4, down 2.3% from last week.

Figure 12: Ethereum TPS

Data Source: Blockchain Node File, Huobi Research

### 1.12 Ethereum Transaction Fee

The overall transaction fee on Ethereum network has increased from 8,948.3 ETH to 11,589.3 ETH this week, while the average transaction fee on Ethereum network has increased 35.3% to 0.0023 ETH this week.

Figure 13: Ethereum Transaction Fee

Data Source: Blockchain Node File, Huobi Research

### 1.13 Concentration of Wealth on Ethereum Network

**The concentration of wealth on Ethereum network has increased compared to last week.** The top 10 addresses held 11.04% of all ETH, increased by 0.09% from last week; the top 10-100 addresses held 23.53% of all ETH, decreased by 0.07% from last week; the top 100-1000 addresses held 25.24% of all ETH, increased by 0.05% from last week; the remaining addresses held 40.18% of all ETH, decreased by 0.08% from last week's 40.1%, the lowest in two months.

Figure 14: Concentration of Wealth: BTC vs. ETH

Data Source: Blockchain Node File, Huobi Research

### 1.14 ETH Large Transactions Monitor

Huobi Research defines “extra-large transactions” as individual transactions worth over 50,00 ETH, “large transactions” as those worth between 10,000-50,000 ETH, “other transactions” as those worth less than 10,000 ETH. **This week, there were one extra-large transaction of 50,000 ETH and 45 large transactions on the ETH network.**

Figure 15: Large and Extra-large Transactions on ETH Network

Data Source: Blockchain Node File, Huobi Research

### 1.15 Transaction Volume Distribution of Ethereum

The total transaction volume of extra-large transactions, large transactions and other transactions has decreased compared to last week, in which the transaction volume of extra-large transactions received the largest decrease from 11.4% to 0.6% of overall transaction volume on the Ethereum network this week.

Figure 16.1: Transaction breakdown by volume (in thousands)

Figure 16.2: Weekly ETH transaction distribution

Data Source: Blockchain Node File, Huobi Research

Data Source: Blockchain Node File, Huobi Research

### 1.16 Change in Balance of Top 30 Ethereum Addresses

This week, among all top 30 Ethereum address, 5 addresses had significant changes in their respective balances, including 4 net inflows and 1 net outflow. A Bitfinex’s cold wallet (address: 0x61edcdf5bb737adffe5043706e7c5bb1f1a56eea) has the largest change in balance this week, receiving 60,000 ETH.

## 2. Social Media Data

### 2.1 Keyword Analysis (China)

Huobi Research analyzed text using NLP Word Cloud to extract relevant keywords and understand the overall sentiments from China's largest Cryptocurrency online community 8btc.com. Specifically, we break down the keywords to three categories: Cryptocurrencies, Events, and Exchanges/Opinion Leaders.

In the Cryptocurrencies category, **NLP Word Cloud suggests Bitcoin, EOS, and Ethereum as the three cryptocurrencies that received the most widespread attention** (similar to previous weeks), with discussions mainly focused on price and trading strategies.

In the Events category, **NLP Word Cloud suggests “Risk”, “Online” and “Ecosystem” as the hottest words of the week.** “Risk” has been the top word for 6 consecutive weeks, with its discussions focused on 1. the risk of continuing downtrend in BTC price; 2. the risk resulted by security vulnerability of USDT; and 3. The risk of arbitrage. “Online” referred to 1. the fact that ETC was available for trade on Coinbase; 2. Binance to resume fiat-Cryptocurrency trading before the end of this year. Discussions on “Ecosystem” focused on the ecosystem development of multiple Cryptocurrency projects, including ETC, EOS and ACT.

In the Exchanges/Opinion Leaders category, **NLP Word Cloud suggests “Huobi”, “OKEX”, and “Fcoin” as the three hottest words of the week.** Specifically, posts regarding “Huobi” and “OKEX” mainly focused on the Cryptocurrency listing procedures and their respective Cryptocurrency prices, with discussions on “OKEX” also focused on its futures/options trading as well as the decision to unlist GTC from its exchange.

Figure 18: 8btc.com Word Cloud

Data Source: Huobi Research

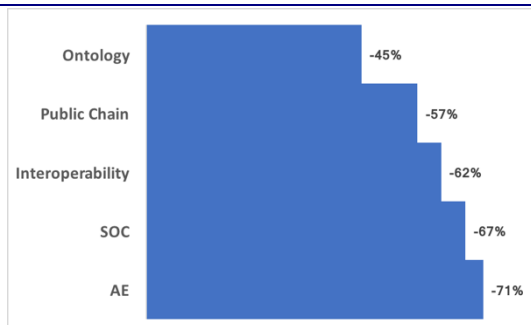

We witness a drastic change in the trending topics this week, with focus on “NEO”, “IOTA”, “Zhang Jian (of Fcoin)”, “PoW” and “Ripple” receiving the largest increase, while focus on “AE(ternity)”, “Ontology”, “Public Chain”, “Interoperability” and “SOC” receiving the largest decrease.

Figure 19.1: Most Trending Topics on 8btc.com

Data Source: Huobi Research

Figure 19.2: Least Trending Topics on 8btc.com

Data Source: Huobi Research

## 2.2 Keyword Analysis (Overseas)

We also performed NLP Word Analysis on Reddit’s r/CryptoCurrency Subreddit to understand the trending topics and overall sentiments overseas, and we similarly broke down the keywords into three categories: Cryptocurrencies, Events, and Exchanges/Opinion Leaders.

In the Cryptocurrencies category, NLP Word Cloud suggests that, “**Bitcoin**”, “**Ethereum**”, and “**IOTA**” as the three cryptocurrencies that received the most widespread attention this week. Discussions on Bitcoin focused on the recent BTC price as well as the postpone of BTC ETF decision, while discussions on

Ethereum focused on price and trading strategy. Discussions on IOTA this week focused on the decision of several major exchanges to halt IOTA withdraw, and the potential IOTA use case in IoT industry.

In the Events category, NLP Word Cloud suggests **“BOT”**, **“ETF”** and **“Technology”** as the three hottest words of the week. Discussions on **“BOT”** focused on its trading strategy, while discussions on **“ETF”** focused on the SEC postponing the BTC ETF decision. **“Technology”** referred to the recent news that Bank of America, IBM and Mastercard had over 100 patents related to Blockchain technology.

In the Exchanges/Opinion Leaders category, NLP Word Cloud suggests **“Coinbase”**, **“Binance”**, and **“McAfee”** as the three hottest words of the week, with discussions on **“McAfee”** focused on 1. Bitfi wallet has been hacked; 2. McAfee’s announcement on Twitter that awards 100,000 USD to the first person to successfully hack Bitfi.

Figure 20: Reddit Word Cloud

Data Source: Huobi Research

This week on r/CryptoCurrency, the focus on “Tangle”, “McAfee”, “Bitmex”, “ETF”, “SEC” received the largest increase, while focus on “Monero”, “Binance “Lightning”, “Stellar” and “NEO ” receiving the largest decrease in a week.

Figure 21.1: Most Trending Topics on r/CryptoCurrency

Figure 21.2: Least Trending Topics on r/CryptoCurrency

Data Source: Huobi Research

Data Source: Huobi Research

### 2.3 GitHub Code Activity

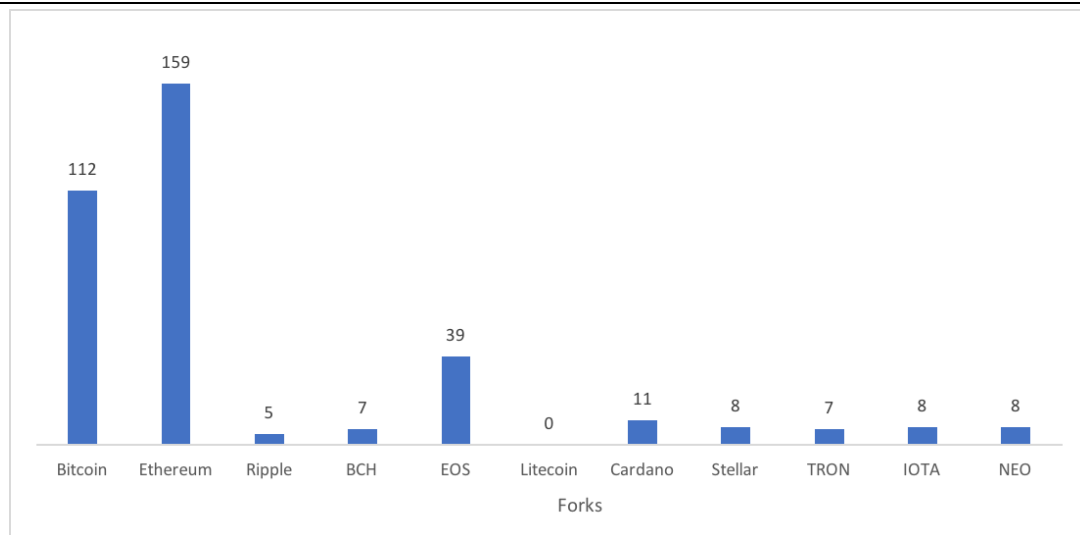

Among all GitHub repositories, **BTC, ETH and TRX** were the top **Cryptocurrencies** projects that received the most stars and watchers in a week; **ETH, BTC and EOS** were the projects that received the most forks in a week; **ETH, TRX and EOS** were the projects with the most commits this week, in which **EOS** released 3 commits this week.

Figure 22: Stars and Watchers on GitHub

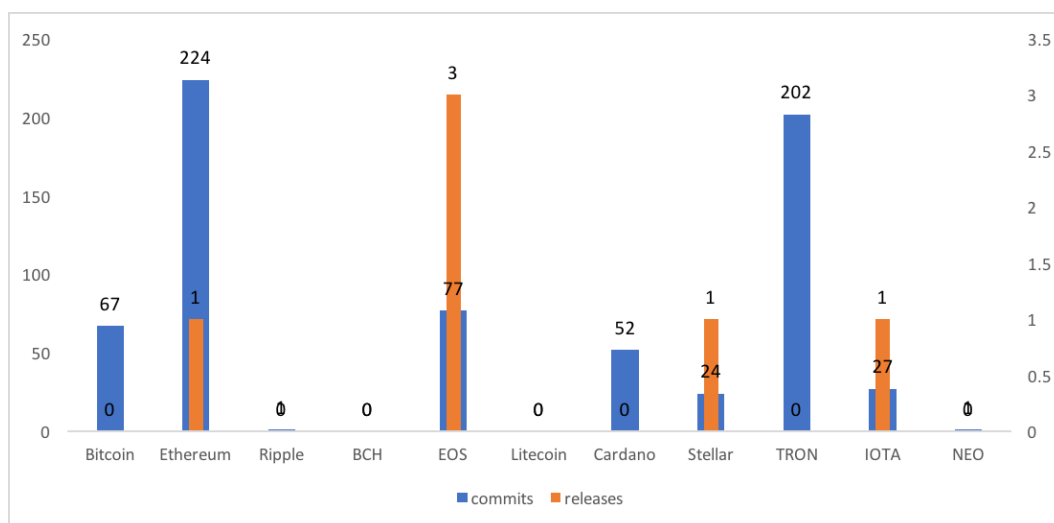

Data Source: GitHub, Huobi Research

Figure 23: Forks on GitHub

Data Source: GitHub, Huobi Research

Figure 24: Commits and Releases on GitHub

Data Source: GitHub, Huobi Research

## 2.4 Search Trends

This week, there has been decreasing searching interest for Cryptocurrency and Blockchain-related keywords on Google and Baidu, in which the search for “EOS” on Google and search for “Blockchain” on Baidu received the largest decrease of 16.7% and 11.7%, respectively.

Figure 25: Weekly Changes in Search Trends

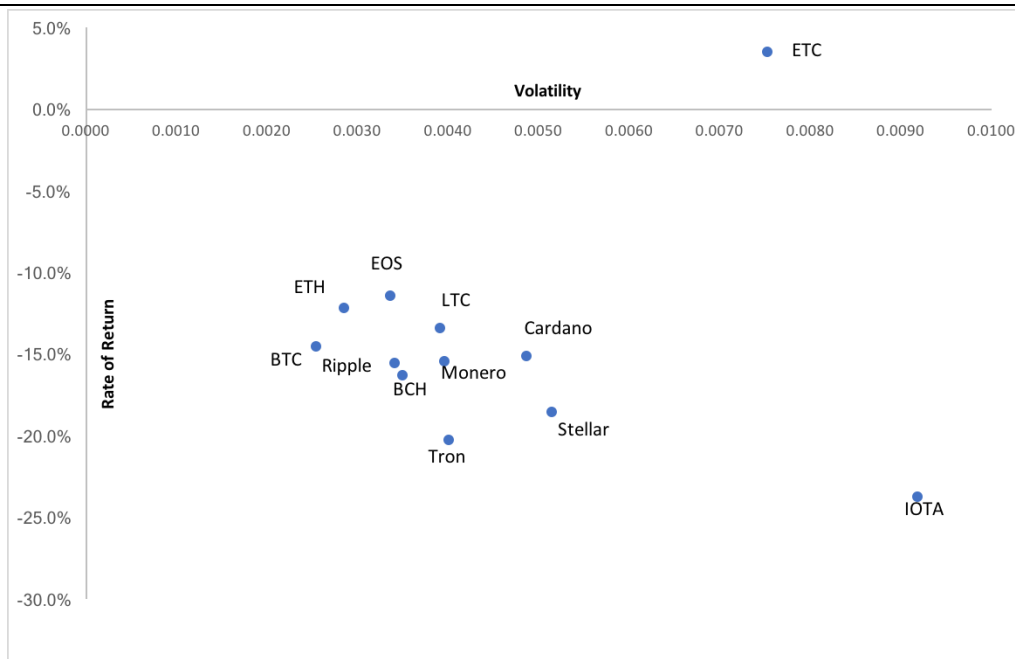

Data Source: Huobi Research, Google Trend, Baidu Index, Wechat Index

### 3. Market Data

#### 3.1 Rate of Return/Price Volatility

**In the cryptocurrency market this week, the price of all top 10 Cryptocurrencies except for ETC experienced decrease to various degrees.** Among all top 10 cryptocurrencies, IOTA experienced the largest decrease of 23.8% and ETC experienced the largest increase of 3.5% in their respective prices. In terms of price volatility, BTC has the smallest volatility rate of 0.0025 s.d. (standard deviation of price fluctuation in every 15 minutes), while IOTA has the largest volatility rate of 0.0092 s.d.

Figure 26: Rate of Return vs Price Volatility

### 3.3 Cryptocurrency Price Correlations

Correlation amongst assets is the degree to which they move in tandem. The matrices above show Pearson correlations and p-values that are computed from log-returns of volume-weighted average daily prices over the past week.

This week, there were high correlations between the price of all top 10 Cryptocurrencies except for ETC. BTC/Stellar and BTC/BCH had the highest correlation coefficient of 0.98 and 0.96, while ETC/BTC and ETC/Stellar had the highest correlation coefficient of -0.52 and -0.51, respectively.

## About Us:

Huobi Research was founded in April 2016 and started research and explorations in various aspects in Blockchain area since March 2018. We cover various fields such as Blockchain technology research, industry analysis, application innovation and economic model explorations. We aim to establish a research platform and to offer theoretical foundations as well as judgements of trends in Blockchain to the public, ultimately promoting the development of the Blockchain industry.

*Huobi Data Analytics Weekly* aims to provide participators of the cryptocurrency market with the most up-to-date and comprehensive database to help them facilitate decision-making process.
