Huobi Research Weekly (Vol.24)

2018/8/13-2018/8/20

Abstract

Market cap and transaction volume of cryptocurrencies remained stable this week, with 30 of the top 100 cryptocurrencies increased to varying degrees. On August 20th, the total market cap of the TOP100 cryptocurrencies reached to 212.289 billion dollars, a 1.07% decrease from last week. 6 Cryptocurrency projects entered the top 100 this week. On August 20th, Bitcoin's price was at \$6400.32, up 1.11% from last week, and Ethereum price was at \$295.90, down 8.70%. **HB10's price increased by 1.78% this week.**

Average number of transactions per block slightly increased and average block size slightly decreased on Bitcoin. Both average number of transactions and average block size increased on Ethereum. Average number of unconfirmed transaction in Ethereum and Bitcoin decreased and increased by 39% and 10.19%, respectively. Bitcoin's transaction fees decreased and Ethereum's transaction fees increased. The 7-day average of unconfirmed transactions for Bitcoin and Ethereum are 2888 and 41506, respectively. Bitcoin's Hashrate increased by 5.64% and Ethereum's decreased by 2.69%. The average transaction fees on the Bitcoin and Ethereum network this week were \$0.653 and \$0.195, increasing 33.53% and 7.14% respectively. Total number of addresses on the Bitcoin and Ethereum network reached 27.82 million and 43.71 million, respectively.

XMJ was the most active project on GitHub this week, with 128 commits submitted in the past week. Multiversum was the most popular group on Telegram. In terms of community activity, Bitcoin, Ethereum, and Ripple remained as the most popular communities on Facebook and Twitter. Multiversum attracted the most fans on Telegram in the last 24 hours.

According to <Huobi Blockchain Big Data Weekly Insights>, "Bitcoin", "Bot" and "Coinbase" were the hottest words on r/CryptoCurrency this week. Among the top three search engines (Google, Baidu, WeChat), the popularity for Bitcoin and Ethereum increased, but other cryptocurrencies and blockchain continued to decline in both Baidu and Google last week.

Singapore had the most ICOs this week, with platform projects being the most popular ICO project category. Among all 40 ICO projects, majority of them took place in Singapore. Platform projects were the majority. Financing applications were the majority in application projects. 9 investment activities took place in the Blockchain industry this week, Blockchain application attracted the most investment. SNC obtained a 10Million RMB Pre-A round financing from OK Capital, accounted for the largest financing this week. In addition, Huobi Global Ecology Fund made a strategic investment in TokenPocket and Bitland made a strategic investment in Lambda Project, the specific amount for both transactions has not been disclosed.

1. Weekly Market Review

1.1 Market overview

This week, the overall market capitalization for the TOP100 cryptocurrencies remained stable, with 30 projects increased in value to varying degrees. According to coinmarketcap, as of August 20th, 2018, the total market cap of the TOP100 cryptocurrencies was 212.289 billion U.S. dollars, a decrease of 1.07% from last week. 6 Cryptocurrency projects entered the top 100 this week. Among which, TTU had the largest increase of 252.13%, bringing its rank up to No.86. AOA had the largest decrease of 34.52%, and its market cap ranking declined to No.83. In addition, there were 6 projects that entered TOP100, TTU(increasing 252.13%, ranking up 128 places), CTXC (increasing 73.53%, ranking up 47 places), ELA (increasing 31.46%, ranking up 25 places), VERI (increasing 19.14%, ranking up 16 places), QASH(increasing 5.66%, ranking up 5 places), and XET (ranking up 1310 places). The biggest change in ranking was XET, ranking up by 1310 to NO.98. The largest increase in price this week was TTU, increasing by 252.13%. The largest decrease in price was AOA, decreasing by 34.52%. As of August 20th, 2018, Bitcoin was traded at 6400.32 USD, 1.11% higher than its price last week. Ethereum was traded at 295.90 USD, 8.70% lower than its price last week.

Table 1.1: Top Five Price Increases and Decreases

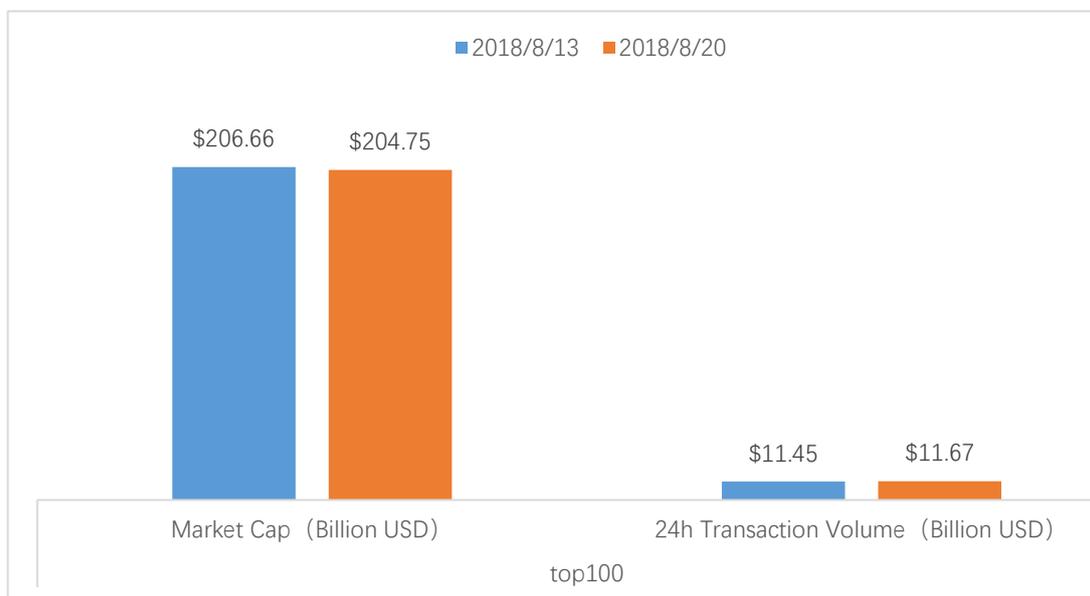

Symbol	Price decrease	Symbol	Price increase
AOA	-34.52%	TTU	252.13%
BNB	-15.69%	CTXC	73.53%
MAID	-15.62%	ONT	44.52%
BCD	-14.84%	NANO	38.94%
REP	-14.36%	VET	35.76%

Source: coinmarketcap

The overall 24h trading volume slightly decreased this week. Overall, the 24h trading volume decreased by 0.93% compared with the same period of last week. In this week, 10 projects of the TOP100 project increased by more than 100% in 24h trading volume, of which the highest was ONT, with an increase of 686.46%, followed by AION with an increase of 348.07%

compared to last week. This week, there were 56 projects that saw a decrease in trading volume. 12 projects fell more than 50%, of which the lowest was AOA, a drop of 87.54%.

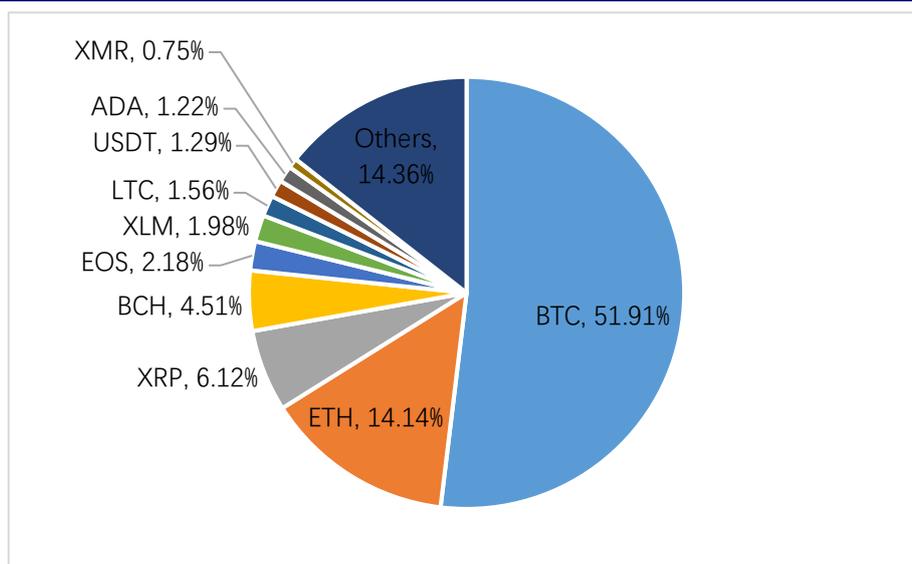

Figure 1.1: The Market cap and 24-hour Trading Volume for TOP100 cryptocurrencies

Source: coinmarketcap

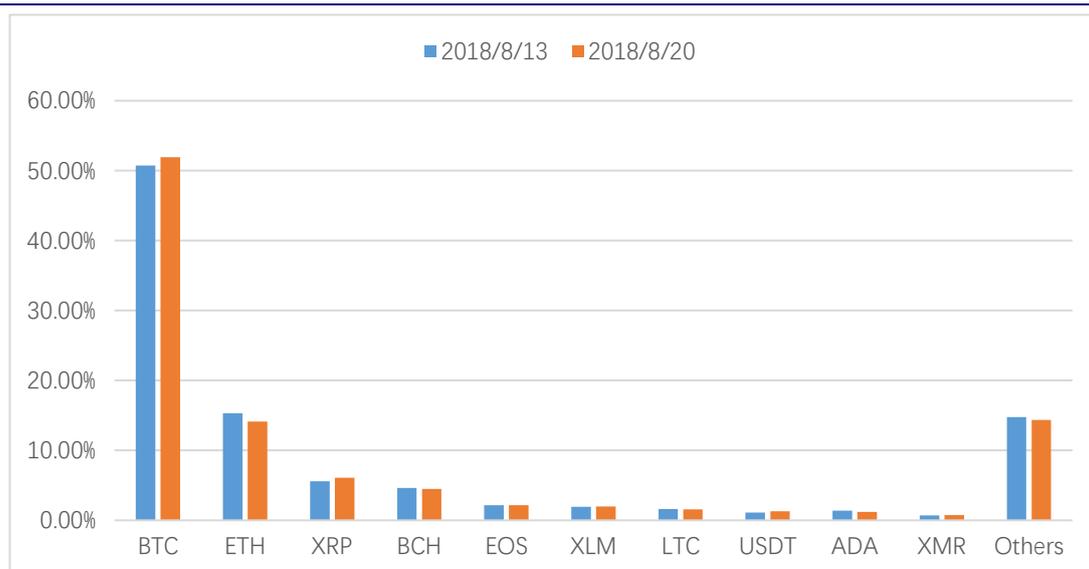

The TOP10 cryptocurrencies’ market share distribution remained stable, 60% of the market caps have increased to varying degrees. On August 20th, the overall market cap of the TOP10 cryptocurrencies was 181.802 billion USD, a decrease of 0.58% from last week, accounting for 85.64% of the total market capitalization of cryptocurrencies, maintaining a stable market share compared to last week. ADA had the largest decrease of 12.17%. BTC’s market share was 51.91%, an increase of 1.16% compared to last week.

1.2 Segment Analysis

The market cap of application projects decreased the most and average market cap of Tokenization projects decreased the most. As of August 20th, 2018, the total market cap of application class reached 45.305 billion USD, experiencing a decrease of 7.31% compared to last week, which is the

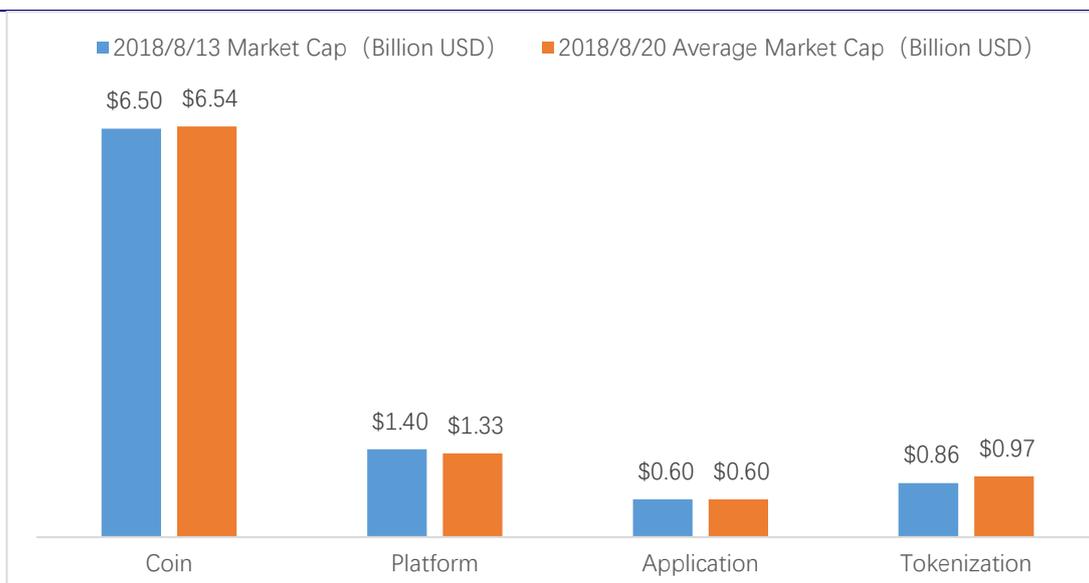

biggest decrease among all class. In addition, average market cap of platform projects was 1.33 Billion USD, a decrease of 4.58%, which is the biggest among all class.

Figure 1.4: TOP100 Cryptocurrencies Market Segment Capitalization

Source: coinmarketcap

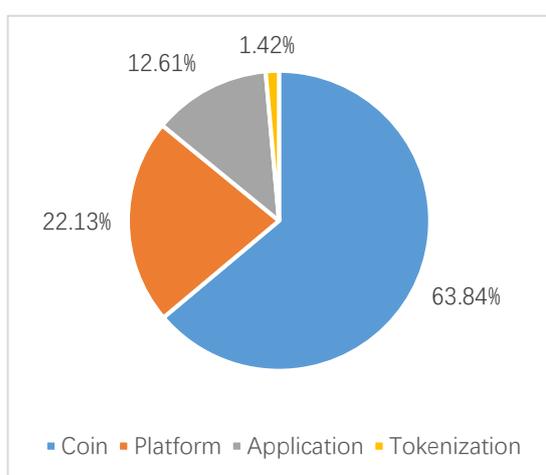

Figure 1.5: TOP100 Cryptocurrencies Segment Average Market Cap

Source: coinmarketcap

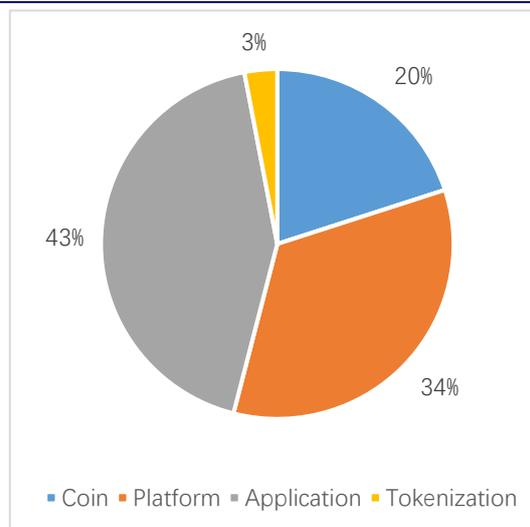

The market segment distribution of the TOP100 cryptocurrencies remained stable. As of August 20th, 2018, the proportion of the market segments has remained stable among the TOP100 compared to last week. The number of platform projects decreased by 1, the number of application projects increased by 1, and the number of coin and tokenization projects remained unchanged. The largest overall market cap by segment is still coin projects, accounting for 63.85%, a slight increase compared to last week.

Source: coinmarketcap

Figure 1.7: TOP100 Cryptocurrencies Segment Market Share

Source: coinmarketcap

Note: According to the different attributes of cryptocurrencies, Huobi Research will divide them into four categories: Coin, Application, Platform and Tokenization.

Coin: The coin category refers to cryptocurrencies that aim to solve the problems of modern day fiat currencies, providing benefits like decentralization, improved safety, lower transaction fees, and faster confirmation speeds. The most popular coin cryptocurrency is Bitcoin. The value of coin cryptocurrencies lies in its ability to act as a medium of exchange.

Blockchain Platform: The Blockchain platform category refers to Blockchain projects that provide a platform upon which developers can create applications using the underlying Blockchain. Applications can utilize the platform’s Blockchain without needing to create one themselves. Blockchain platform assets grant the right to use and participate in the platform.

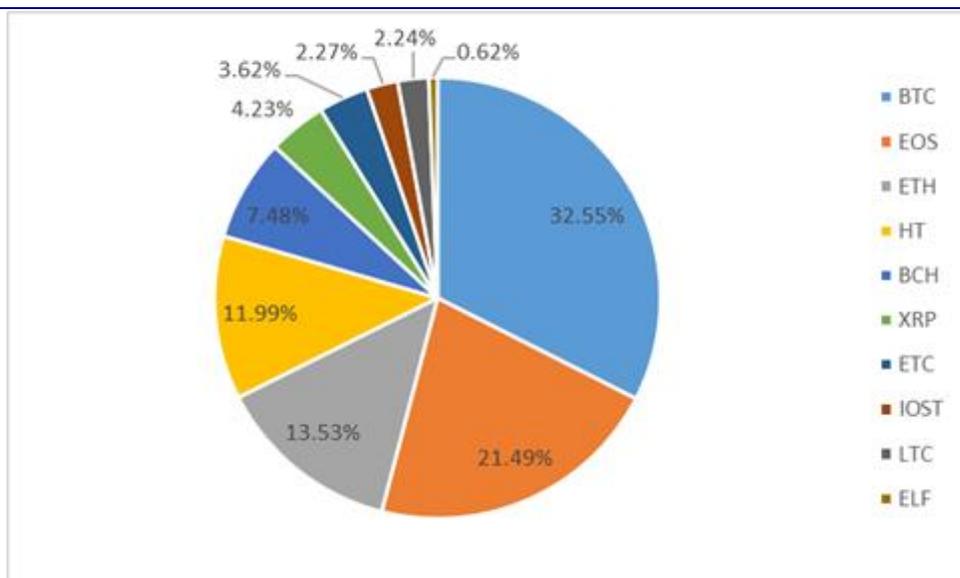

Blockchain Application: The Blockchain application category refers to Blockchain projects that have specific use cases. These could either utilize their own Blockchain, or exist on a Blockchain platform as a “dApp”. Blockchain application assets grant the right to use and participate in its use cases, and its value lies in the application’s ability to perform its function.

Tokenization: The tokenization category refers to Blockchain projects that is linked to actual assets like gold or USD. The most popular tokenization project is Tether. The value of a tokenization asset lies in the value of the underlying physical assets.

1.3 HB10 Index

The Huobi Power Index (HUOBI 10) increased by 1.78% this week. According to the platform data of the Huobi Global Exchange, as of early morning of August 20th, 2018, the index was 604.19, comparing to 593.65 at the same time last week, an increase of 1.78% in the 7-day period; the highest level was 632.02 in the middle of the week and the lowest was 503.54.

Figure 1.8: HB10 Cryptocurrencies Segment Ratio

Source: Huobi global exchange platform, Huobi Research

Note: Huobi10 is composed of 10 currencies with large scale and good liquidity in Huobi Pro, which can comprehensively reflect the overall performance of the market. The index sample space is all USDT transaction currencies for the online transaction of Huobi Pro, which is composed of three types of assets: "currency", "platform" and "application"

according to the different attributes of the Blockchain assets. We calculate the weight of the constituent currency using the weight of the composite price index formula every 15 seconds.

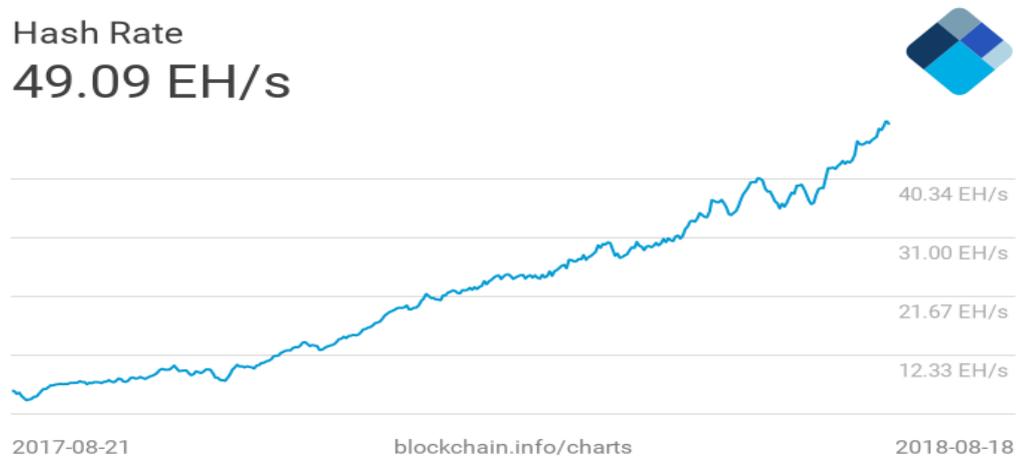

2. Technical Statistics

2.1 Cryptocurrency Mining Statistics

Hashrate of Bitcoin and Ethereum both increased this week. From August 13th to August 19th, 2018, the average bitcoin Hashrate for the entire network reached 49.09 EH/s, an increase of 5.64% from the previous week.

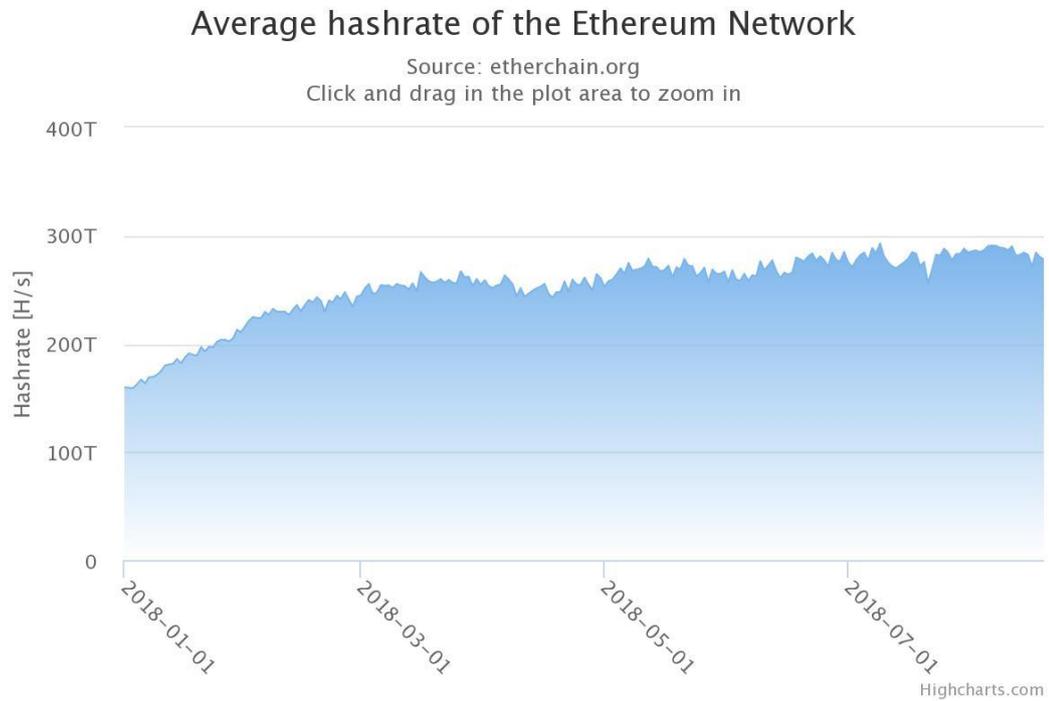

Average Hashrate for the entire Ethereum network was 280.380 TH/S this week, a decrease of 2.69% from the previous week.

Figure 2.1: Bitcoin Hashrate Changes

Source: blockchain.info

Figure 2.2: Ethereum Hashrate Changes

Source: etherchain

This week, the difficulty of mining in Bitcoin and Ethereum has greatly increased. At August 19th, 2018, Average difficulty for mining Bitcoin this week was 6.46T, increased 7.07% compared with the previous week. The average difficulty of mining Ethereum this week was 3.482P, a decrease of 2.41% compared with the previous week.

Figure 2.3: The Difficulty of Mining in Bitcoin

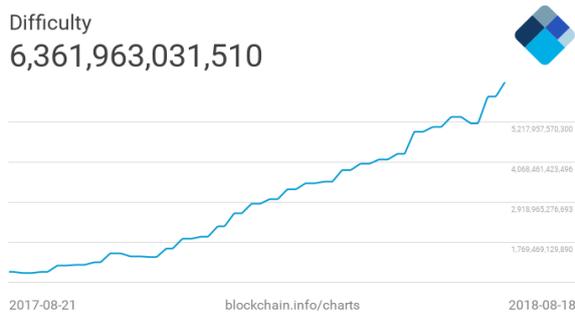

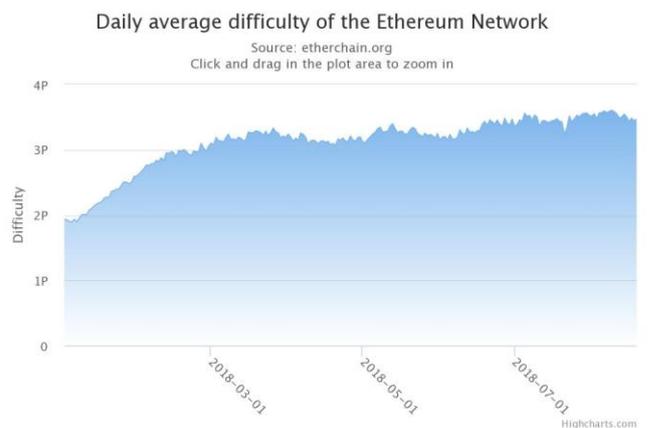

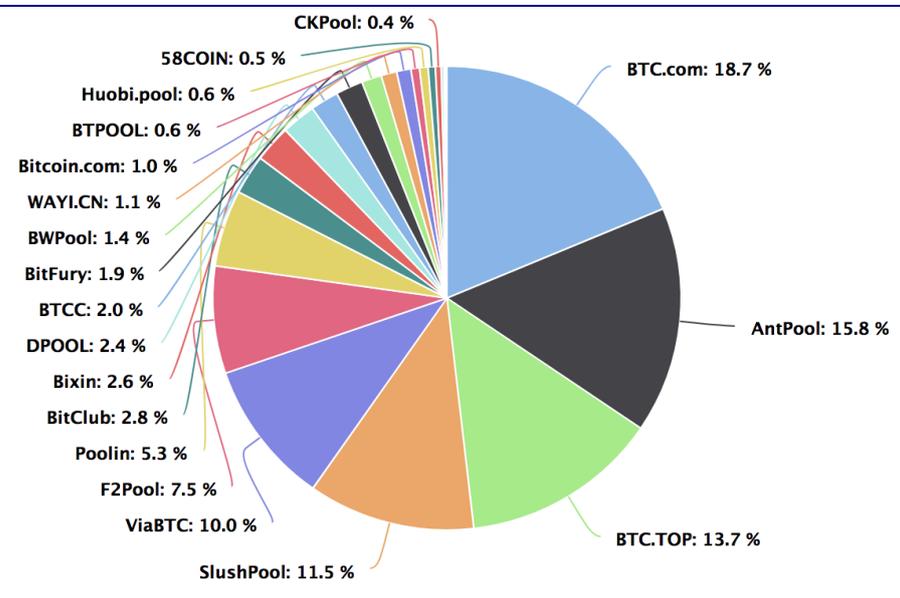

Figure 2.4: The Difficulty of Mining in Ethereum

The percentage of BTC.com in the overall mining pool market slightly decreased, and the Top 5 remained stable. The overall distribution of the Ethereum mining pools remained stable. From August 13th to August 19th, 2018, Bitcoin mined 1066 blocks in the past week, a decrease of 2.12% from the previous week. Among the top five pools were BTC.com, AntPool, BTC.TOP, Slushpool and ViaBTC. Those 5 pools mined 190, 160, 139, 117 and 102 respectively, accounting for 17.82%、15.01%、13.04%、10.98% and 9.57%. The Hashrates were 8.7EH/s, 7.33EH/s, 6.37EH/s, 5.36EH/s and 4.67EH/s respectively.

In the past week, Ethereum's entire network mined 41367 blocks, which was a decrease of 0.131% from the previous week. The top five pools are Ethermine, SparkPool, f2pool_2, Nanopool, and miningpoolhub_1, which mined 12116, 6848, 5425, 4441, and 3766 blocks respectively, accounting for 29.29%, 16.55%, 13.11%,10.73%, and 9.1% respectively.

2.2 Activity Statistics

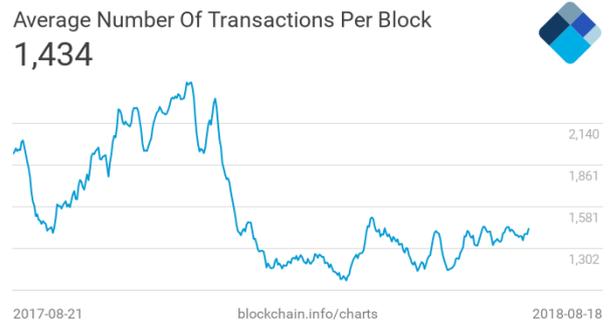

Bitcoin's block size slightly decreased and the average number of transactions per block slightly increased. Average number of transaction and block size both increased for Ethereum. According to blockchain.info, from August 13th to August 19th, 2018, the average number of transactions per block on Bitcoin was 1434, an increase of 3.98% from last week. The average size of each block was 785.8Kbs, a decrease of 2.29% from last week.

Figure 2.7: Block Size of Bitcoin

Source: blockchain.info

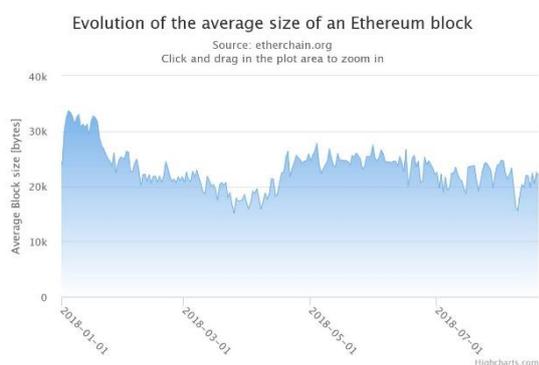

Figure 2.8: The Average Transactions of Per Block in Bitcoin

Source: blockchain.info

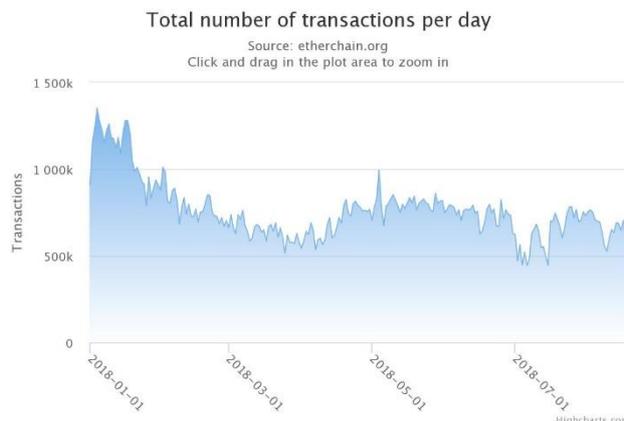

According to etherchain, the average number of transactions per block in Ethereum this week was 112.3, a 6.78% increase compared with the previous week. The average size of each block was 21578 bytes, which was an increase of 13% compared to last week.

Figure 2.9: Evolution of the average size of an Ethereum block

Source: etherchain

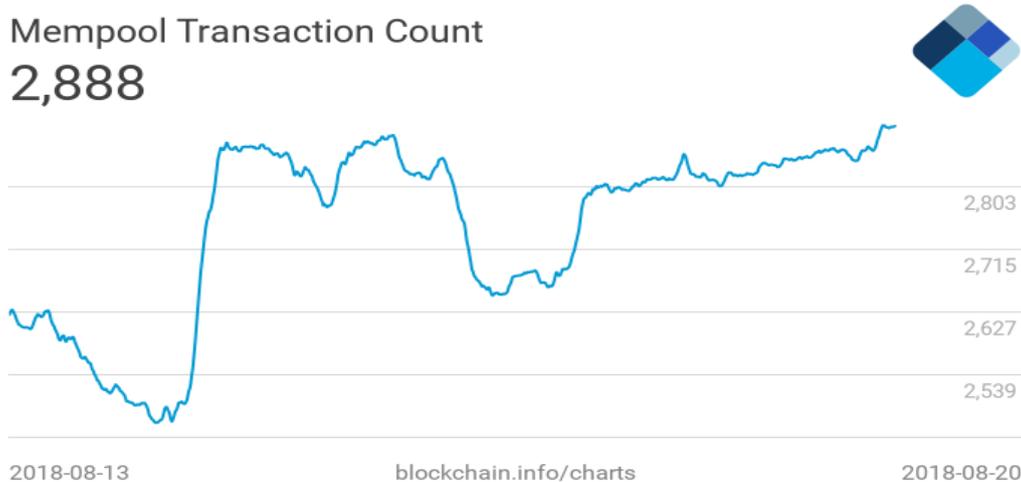

Figure 2.10: The number of transactions per day

Source: etherscan.io

Number of unconfirmed transactions in Bitcoin and Ethereum increased 10.19% and decreased 39% respectively comparing to last week. As of August 20th, 2018, the number of 7-day average unconfirmed transactions in Bitcoin network was 2888, an increase of 10.19% from last week. As of August 20th, the number of unconfirmed transactions in Ethereum network this week was 41506, a decrease of 39% from last week. The lowest amount of unconfirmed transactions this week was 24733 and the highest amount reached 85083.

Figure 2.11: Unconfirmed Transaction in Bitcoin

Source: blockchain.info

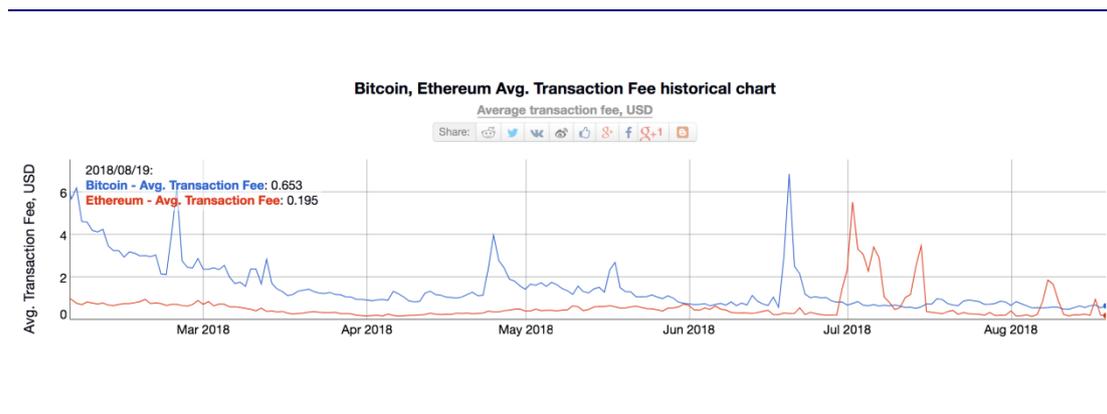

Figure 2.12: Unconfirmed Transaction in Ethereum

Source: etherscan.io

Transaction fees of Bitcoin and Ethereum both increased this week. As of August 19th, 2018, average transaction fees of Bitcoin this week was 0.653USD, which is up 33.53% from last week. Average transaction fees of Ethereum this week was 0.195USD, an increase of 7.14% from last week.

Figure 2.13: Bitcoin, Ethereum Average Transaction Fees

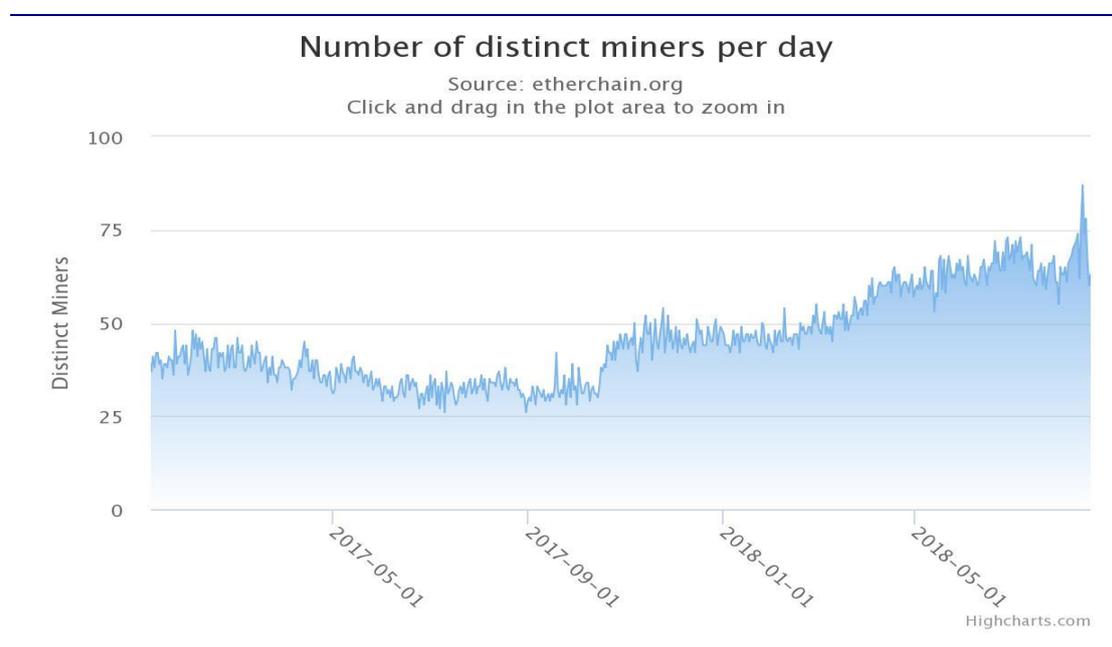

Source: bitinfocharts

The average number of distinct miners per day in Ethereum increased slightly. From August 13th to August 19th, 2018, the average number of distinct miners per day in Ethereum this week was 72.28, higher than last

week (69.14) by 4.5%.

Figure 2.14: Number of Distinct Miners Per Day

Source: etherchain

The number of nodes increased slightly for Bitcoin and increased significantly for Ethereum. As of August 20th, 2018, Bitcoin nodes reached 9632, an increase of 0.354% from last week, of which 2,322 nodes were in the U.S, 1773 nodes were in Germany, and 694 nodes were in China, accounting for 24.11%, 18.41% and 7.21% of the total number of nodes, respectively.

As of August 20th, 2018, Ethereum nodes reached 17086, which was an increase of 7.1% from the previous week. There were 8456 nodes in the U.S, 1867 nodes in China, 1238 nodes in Canada accounting for 49.49%, 10.93%, 7.25% of the total number of nodes respectively.

Table 2.1: Bitcoin Node Ranking by Country

RANK	COUNTRY	NODES
1	United States	2322 (24.11%)
2	Germany	1773 (18.41%)

2.3 Community Activity Statistics

The top three most popular cryptocurrencies on Facebook are Bitcoin, Ethereum, and Ripple in decreasing order, with 493K, 161K and 150K fans respectively. The top three most popular cryptocurrencies on Twitter are Ripple, Bitcoin and Ethereum in decreasing order. The number of fans on Twitter of Ripple (XRP), Bitcoin and Ethereum which has 926K, 890K, and 452K fans respectively.

As of August 13th, Multiversum received the most attention on Telegram, with more than 100,000 fans. The fastest rising Telegram group, is Multiversum with more than 100,000 fans joining the telegram group within 24 hours.

Table 2.3: Facebook Cryptocurrency Fans Ranking

RANK	Cryptocurrency	Fans (thousands)
1	Bitcoin	49.3
2	Ethereum	16.1

2.4 Huobi Blockchain Big Data Weekly Insights

Huobi Research performed NLP Word Analysis on Reddit’s r/CryptoCurrency Subreddit to understand the trending topics and overall sentiments overseas, and we similarly broke down the keywords into three categories: Cryptocurrencies, Events, and Exchanges/Opinion Leaders.

In the Cryptocurrencies category, NLP Word Analysis suggests **Bitcoin**, **Ethereum**, and **Ripple** as the three cryptocurrencies that received the most widespread attention this week, with discussions mainly focused on price and trading strategies.

In the Events category, NLP Word Analysis suggests “Bot”, “Scam”, and “Technology” as the hottest words of the week. “Bot” refers to the trading strategy and return of bot trading. “Scam” refers to many Cryptocurrency projects in China. “Technology” refers to the newest technological development in Blockchain industry, including sharding, side-chain, and DAG, as well as the recent news that banks are increasing their investments in Blockchain research.

In the Exchanges/Opinion Leaders category, NLP World Analysis suggests “Coinbase”, “Satoshi”, and “Binance” as the hottest words of the week. “Coinbase” and “Binance” refers to the normal discussion between Cryptocurrency investors overseas, and “Satoshi” refers to a trending topic that Bitmain owns more BCH than Satoshi.

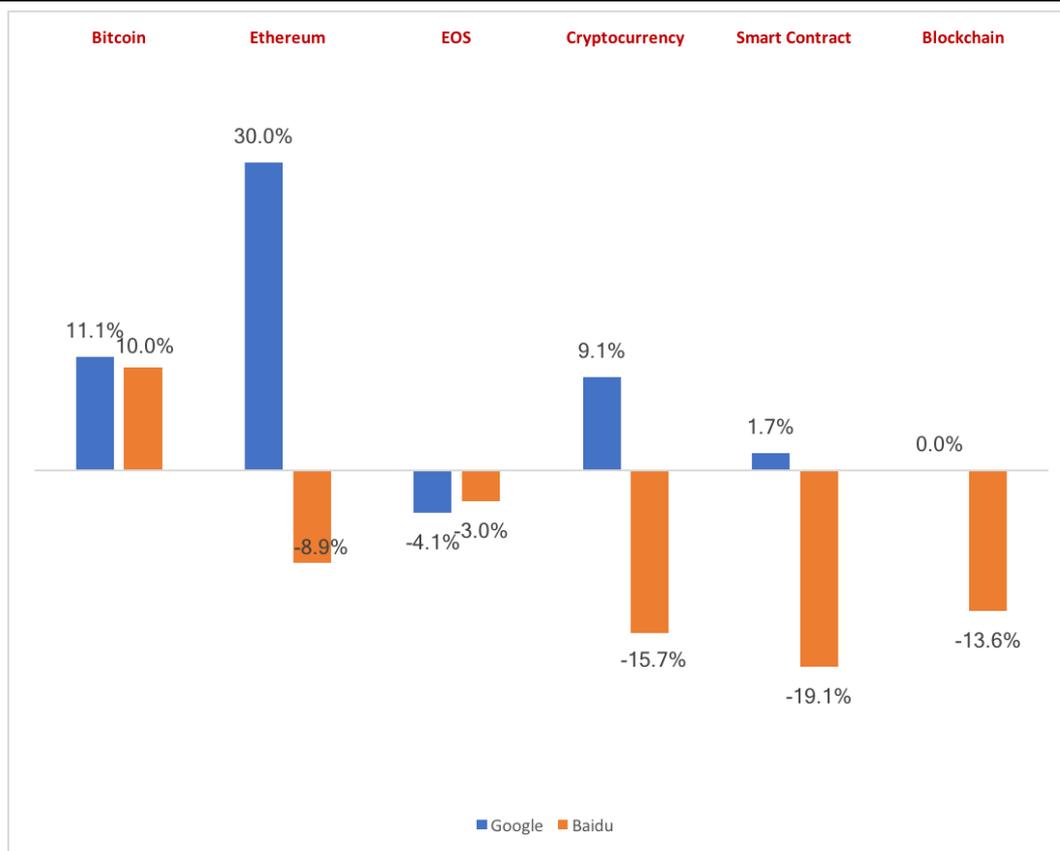

Figure 2.19: Reddit Word Cloud

Data Source: Huobi Research

On Baidu, search interest increased for “Bitcoin” but decreased for “Cryptocurrency”, “Smart Contract” and “Blockchain”, with the search interest for “Smart Contract” receiving the largest decrease of 19.1%. On Google, search interest for all keywords except for “EOS” experienced an increase, in which the search interest for “Ethereum” received the largest increase of 30%.

Figure 2.20: Weekly Changes in Search Trends

3. Weekly Blockchain News Review

3.1 Industrial Application

1. US Border Officials to Test Blockchain for Certificate Tracking

U.S. Customs and Border Protection (CBP) plans to trial blockchain technology to verify North American Free Trade Agreement (NAFTA) and Central American Free Trade Agreement (CAFTA) certificates. CBP Division of Business Transformation and Innovation head Vincent Annunziato said the agency was beginning a "live fire testing" of a blockchain platform to certify that imported products originated. The new system, which will launch in September, is going to help CBP verify information about imported goods and check how foreign suppliers act toward American importers. The system can also be used to authenticate trademarks and check on an item's physical

properties. In addition, CBP's Commercial Customs Operations Advisory Committee has established a working group to examine blockchain's potential uses.

<https://www.strtrade.com/news-publications-blockchain-NAFTA-CAFTA-certification-pilot-081718.html>

2. UEFA Super Cup Tickets Successfully Distributed to Mobile Phones via Blockchain

At the UEFA Super Cup in Tallinn UEFA distributed tickets for general public to mobile phones via blockchain. UEFA is looking to make its ticket sales process for matches simpler and safer – thanks to a new system aimed at providing secure ticket distribution, and which prevents the replication and duplication of tickets. For this week's UEFA Super Cup match between Real Madrid and Atlético de Madrid in Tallinn, a new system was fully deployed whereby UEFA distributed 100% of the match tickets sold to the general public through the deployment of a blockchain-based dedicated iOS and android app. To achieve this, UEFA chose a blockchain-based ticket distribution system combined with mobile Bluetooth devices at the stadium entrances.

<https://www.uefa.com/insideuefa/about-uefa/news/newsid=2566998.html>

3. IBM, AAIS Pilot Insurance Blockchain for Regulatory Reporting

The American Association of Insurance Services (AAIS) announced it is piloting a blockchain project for reporting to US state regulators. The project aims to improve operational efficiency, thereby reducing costs. AAIS is a non-profit governed by the Property and Casualty insurance industry. It gathers information from the industry and analyses it to provide loss reports and rating information for carriers and state regulators. The project called open Insurance Data Link (openIDL) will involve writing the data to a secure blockchain. This allows the data to be shared with appropriate parties in a secure and tamper-proof manner. Regulators have permission to access only the data they need. Participating carriers can also view their own information and see a comparison with the rest of the market as a whole.

<https://www.ledgerinsights.com/ibm-aa-is-blockchain-insurance-compliance-reporting/>

4. Chinese Retail Giant JD.com Launches Open Blockchain Platform

JD.com, China's largest retailer and e-commerce provider, has deployed an open blockchain platform to enable customers to have their own blockchain solutions to improve the transparency, efficiency and security of their operations. The JD Blockchain Open Platform expands the company's Retail as a Service and will allow customers to build smart contracts on both private and public enterprise clouds. The platform will allow companies to streamline tracking of product movement, property assessments, digital copyrights and authenticity certifications. China Pacific Insurance Company (CPIC) has become the first JD.com partner to use the open blockchain platform. The insurance company applies a unique blockchain ID to each invoice document, improving the efficiency and streamlining the accounting process, thereby strengthening the security governance of electronic invoices.

<https://www.ccn.com/chinese-retail-giant-jd-com-launches-open-blockchain-platform/>

3.2 International Policies

1. There's Now an Exchange-Traded Bitcoin Note That American Investors Can Buy

It's an exchange-traded note, and starting Wednesday, investors can buy it more easily even though it's technically listed and regulated in Sweden. The product, called Bitcoin Tracker One, is now quoted in U.S. dollars under the ticker CXBTF, helping brokerages offer it to American investors. It started trading on the Nasdaq Stockholm exchange in 2015. Trading Bitcoin Tracker One is now similar to buying an American depositary receipt, in that traders will see a foreign-listed asset in U.S. dollars. Investors can purchase so-called F shares, which means that while the trades are executed in U.S. dollars, they are settled, cleared and held in custody in its home market, according to OTC Markets Group.

<https://www.bloomberg.com/news/articles/2018-08-15/lovelorn-u-s-bitcoin-etf-fans-may-find-satisfaction-in-sweden>

2. South Korea Invests \$4.4 Billion in Blockchain Technology

On Aug. 13, local news outlet Yonhap reported that South Korea set aside \$4.4 billion (5 trillion won) to invest in distributed ledger systems and explore various administrative frameworks for the technology. The move was vetted by Korea's finance ministry, according to an official press release, with the

government agreeing to increase tech-focused budget allocations to new-age technologies (such as IoT, AI and blockchain) by more than 65 percent compared to 2017. Korea intends to train and employ 10,000 “specialists” from the eight aforementioned technologies until 2023, allocating \$53 million to this effort. The project, entitled “Growth through Innovation,” details a plan to set up a big data platform using AI and blockchain technology to ensure data management security and boosting the “sharing economy.”

<https://cryptoslate.com/south-korea-invests-4-4-billion-in-blockchain-technology/>

3.3 Technological Breakthrough

1. Capital One Seeks Blockchain Patent for 'Collaborative' Authentication Tool

Capital One Seeks Blockchain Patent for 'Collaborative' Authentication Tool
U.S. banking giant Capital One is working on using blockchain technology to usher in more convenient and secure user authentication methods for instances such as banking security. In a continuation of a patent application submitted to the U.S. Patent and Trademark Office (USPTO) back in June 2017, Capital One sets out a blockchain system that will receive, store and retrieve encrypted user authentication data, according to a filing released Thursday. The proposed idea is described as "a distributed, non-reputable record of authentication interactions" that allows users to authenticate themselves across multiple platforms, but limits how much personal information is shared between them. In effect, the method retrieves identification data on a user when they commence the authentication process.

<https://www.coindesk.com/capital-one-seeks-blockchain-patent-for-collaborative-authentication-tool/>

2. BMO, Ontario Teachers' Test Canadian Debt Issuance on Blockchain

BMO, Ontario Teachers' Test Canadian Debt Issuance on Blockchain
Bank of Montreal and Ontario Teachers' Pension Plan tested a Canadian-dollar debt deal over blockchain, a further step in determining the viability of the new technology in fixed-income markets. Bank of Montreal sold C\$250 million (\$190 million) of one-year floating rate deposit notes to the Ontario pension fund and used blockchain technology to mirror the transaction. The bank's BMO Capital Markets unit built a settlement system using blockchain, with the

prototype allowing issuers and buyers to view transactions on the distributed ledger system. The technology, which the bank says is being used for the first Canadian dollar fixed-income issue, aims to cut costs in areas including compliance, financial reporting, clearing and settlement of cash transactions. The technology, which the bank says is being used for the first Canadian dollar fixed-income issue, aims to cut costs in areas including compliance, financial reporting, clearing and settlement of cash transactions.

<https://www.bloomberg.com/news/articles/2018-08-15/bmo-ontario-teachers-test-canadian-debt-issuance-on-blockchain/>

3. Coinbase Seeks Patent for Security-Enhanced Bitcoin Payment System

U.S.-based digital currency exchange Coinbase has filed a patent on a new Bitcoin payment system designed to make cryptocurrency payments safer. The new platform will provide an added layer of security for users’ keys and allow them to make Bitcoin payments directly from their digital wallets. A segment of the patent filing states, “It may be a security concern for users that the private keys of their Bitcoin addresses may be stolen from their wallets. Existing systems do not provide a solution for maintaining security over private keys while still allowing the users to checkout [sic] on a merchant page and making payments using their wallets.”

<https://bitcoinmagazine.com/articles/coinbase-seeks-patent-security-enhanced-bitcoin-payment-system/>

4. Weekly Project Progress in the Market

4.1 New ICOs this Week

There were overall 40 ICOs this week; Singapore was the country with the most ICOs this week, and the most popular ICO project category was Blockchain platform projects. Among 37 ICOs collected with country information, Singapore was the country with the most ICOs (9), accounting for 22.5% of all ICOs this week.
