2018/5/8

### Abstract

The market cap kept rising this week, while transaction volume of cryptocurrencies declined lightly this week, and LTC market cap rank replaced ADA. On May 6, the total market cap of the TOP100 cryptocurrencies hit 436.55 billion dollars, a 5.83% increase from previous week. Also, over half of the market cap of TOP100 cryptocurrencies increased to varying degrees, among which 11 currencies experienced a spike of over 20%. 24h total market trading volume decreased by 12.42% compared to that of the previous week. LTC market cap hit 9.89 billion dollars, which surpassed ADA. Bitcoin was traded at 9751.33 US dollars, higher than last week by 3.69%, price of Ethereum was 805.52 US dollars, up by 17.05% from last week.

Hash rate of the network increased slightly within this week, The number of Ethereum nodes in China increased by 22.5%. Hash rate for bitcoin increased by 4.03% and hash rate for ethereum increased by 5.96%. The average transaction fee in Bitcoin network this week was 1.76USD, a decrease of 7.68% from that of previous week. The average transaction fee in Ethereum network was 0.44 USD, a decrease of 10.93% from last week.

In terms of technical activity, the number of unconfirmed transactions in Bitcoin network decreased by 21.1. Total number of the Bitcoin addresses reached 24.50 million, and total number of Ethereum addresses reached 32.91 million. The most active group at Github was Rchain, the team had 176 commits in the past week.

In terms of community activity, the top3 famous communities in social media remain unchanged. Bitcoin, Ripple and Ethereum were top3 on Facebook and Twitter. Referum has the largest community on telegram, and the most popular telegram group in the past 24hours was GIF by SOCIF.

New digital assets fundraising this week mostly come from the United Kingdom, with blockchain infrastructure projects capturing most of the market attention. This week, 114 new digital asset projects finalized the public funding process, most of them were from the UK, the US and Russia; and most of them focus on blockchain infrastructure area, followed by areas of blockchain finance and platform etc. Among 2 fundraising projects in the blockchain area that we followed, both of them were strategic investment.

### **1. Weekly Market Review**

### 1.1 Market overview

This week, blockchain asset market capitalization kept rising and the market cap of 11 projects rose by more than 20%. According to coinmarketcap, as of May 6, 2018, the total market cap of the TOP100 cryptocurrencies was 436.5 billion U.S. dollars, an increase of 5.83% from last week, and the market cap of 11 projects rose by more than 20%. Among them, LOOM had the highest increase of 77.5%, and the market cap ranking rose 29 places. Followed by POLY, the market cap increased by 71.6% compared with last week, ranking up 6 to 96th. In addition,CMT(market cap increased 55.62%), and ETN(market cap increased 19.5%)entered TOP100 this week. The highest decline in market cap this week was XIN, which dropped 13 places to 56th place. As of May 6, 2018, Bitcoin was traded at 9751.33 US dollars, higher than last week by 3.69%, price of Ethereum was 805.52 US dollars, up 17.05% from last week.

Table 1.1: Top	Five Price Increases and Decli	nes	
Symbol	Price decrease	Symbol	Price increase
XIN	-28.31%	POLY	71.56%
BTM	-18.21%	LOOM	69.65%
EOS	-16.80%	СМТ	55.62%
GTO	-15.73%	FSN	37.53%
PPT	-15.26%	ZIL	31.58%

The 24h trading volume declined slightly this week, with a decrease of 12.42% compared with last week. On May 6, 2018, the 24h trading volume increase significantly by 12.42% compared with the same period of last week, and 7 projects rose by more than 100%, of which the highest was LOOM with an increase of 1683.04%. Followed by MKR, the 24h trading volume increase by 809.94% compared with last week. This week, there were 56 projects with 24h trading volume decline, of which 20 projects fell more than 50%, of which the highest was ADA, a drop of 82.00%.

Figure 1.1: The Market cap and 24-hour Trading Volume for TOP100 cryptocurrencies

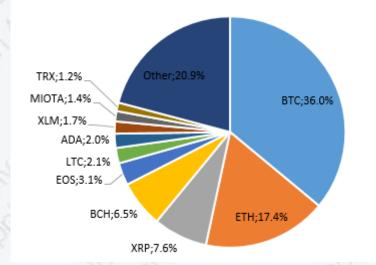

3

Huobi Research Weekly

The TOP10 cryptocurrencies' market share remained stable, EOS was the only one declined in TOP5, and LTC market cap rank replaced ADA. On May 6, the market cap of TOP10 cryptocurrencies was USD 364.5 billion, an increase of 6.6% from last week, accounting for 79.11% of the total market capitalization of cryptocurrencies, with a slight decline compared with last week. EOS market capitalization decreased by 15.28%, but remained in TOP5; LTC market cap rose 14.69% and surpassed ADA. The market share of the 4 cryptocurrencies in the TOP10 declined last week. Bitcoin's market share decreased the most this week, which was 36.02%, remained stable compared with last week.

### **1.2 Segment Analysis**

The market cap of platform class projects rose the most, with the average market cap of application class rose the most. As of May 6, 2018, in the global TOP100 cryptocurrencies by market cap, the market cap of platform class projects rose by 8.25% over the previous week, accounting for the largest increase. This week, the market cap of asset-backed token projects decreased from last week and the market cap decreased by 6.2%. In addition, the average market cap of application projects this week was 1.68 billion US dollars, with an increase of 7.16% over the previous week, accounting for the largest increase.

#### Figure 1.4: TOP100 Cryptocurrencies Segment Market Capitalization

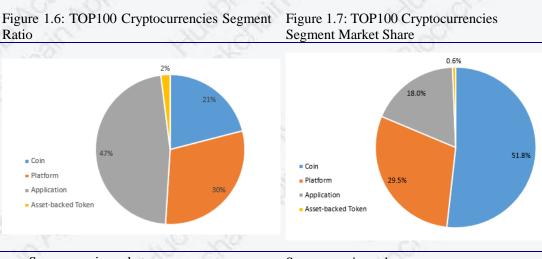

Source: coinmarketcap

#### Figure 1.5: TOP100 Cryptocurrencies Segment Average Market Value

**The classification of global TOP100 cryptocurrencies remained stable.** As of May 6, 2018, among the TOP100 cryptocurrencies by market capitalization, the proportion of the number of projects has remained stable compared to last week. The number of coin projects increased by 2, the number of platform class projects increased by 1, the number of application class projects decreased by 3. The largest market cap was still coin project, accounting for 51.78%, with a slight increase compared with last week.

**Note:** According to the different attributes of cryptocurrencies, Huobi Academy of Blockchain Application will divide them into four categories: Coin, Application Class, Platform Class and Asset-backed Token.

Coin Project: Refers to a type of asset developed based on blockchain technology that does not correspond to a specific use scenario and whose main function is only the transaction target. Its asset value is mainly reflected by liquidity.

Platform Class Project: A type of asset that is associated with the development of the underlying technology of the blockchain and is supported by the right to use or participate in the platform.

Application Class Project: Refers to a type of asset that is associated with a specific application scenario and is supported by a certain right of use, participation, or dividend.

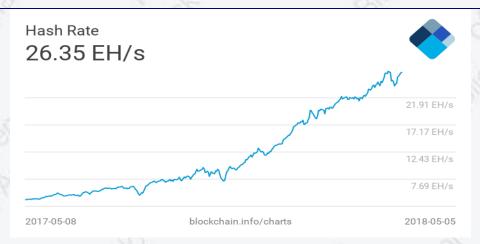

Asset-backed Project: Refers to a class of assets that is linked to actual assets such as gold and US dollars and supported by the value of physical assets.

### 2. Technical Statistic

### 2.1 Cryptocurrency Mining Statistics

Hashrate of Bitcoin and Ethereum both increased this week. From April 30 to May 6, 2018, the average bitcoin hashrate for the entire network reached 26.35 EH/s, with an increase of 4.03% from the previous week. Average Ethereum hashrate for entire network was 272.2 TH/S this week, an increase of 5.96% from the previous week.

### Figure 2.1: Bitcoin Hashrate Changes

This week, the difficulty of mining in Bitcoin remain unchanged and the difficulty of mining in Ethereum has increased. From April 30 to May 7, 2018, Average difficulty for mining Bitcoin this week was 4.02T. The average difficulty of mining Ethereum this week was 3.27P, an increase of 2.66% compared with the previous week.

The percentage of BTC.com in the overall mining pool makret slightly decreased and BTC.top stays in the top 5 mining pool. The market share of Ethermine had a continuous increase. From April 30 to May 6, 2018, the block which bitcoin blockchain mined was 1042 in the past week, a decrease of 9.22% from the previous week, among which the top five pools were BTC.com, AntPool, BTC.top, SlushPool, ViaBTC and BTC.TOP. Those 5 pools mined 261, 159, 113, 98 and 92 respectively, accounting for 25.05%, 15.26%, 10.84%, 9.40% and 8.83%, and the hashrate were 7.43EH/s, 4.53EH/s, 3.22EH/s, 2.79EH/s and 2.62EH/s respectively.

In the past week, Ethereum's entire network dig out 39923 blocks, which is a decrease of 1.2% from the previous week. The top five pools are Ethermine, f2pool\_2, SparkPool, Nanopool, and miningpoolhub\_1, which found 11252, 6654, 6173, 5279, and 3629 blocks respectively, accounting for 28.2%, 16.68%, 15.47%, 13.23% and 9.09% respectively.

### **2.2 Activity Statistics**

The average transaction number of each block in both Bitcoin and Etherem Network continued to decrease and the block size of btc and eth both decreased. According to blockchain.info, from April 30 to May 6, 2018, the average transactions of each block in Bitcoin Network this week was 1485, an decrease of 5.12% from the previous week. The average size of each block was 834 Kbs, an decrease of 3.81% from the previous week.

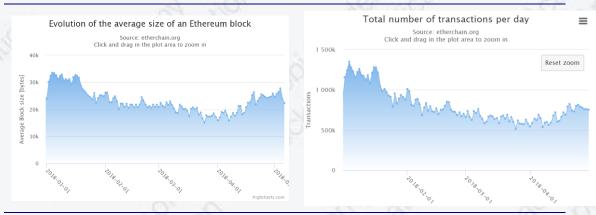

According to etherchain, the average transactions of per block in Ethereum this week was 147.4, which was a increase of 7.9% compared with the previous week. The average size of the block was 25247.14 bytes, which

was an increase of 1.95%% compared with the previous week.

### 3. Weekly Blockchain News Review

### **3.1 Industrial Application**

### 1. ANZ, IBM Develop a Blockchain Insurance Solution in New Zealand

New Zealand's largest bank ANZ, with tech partner IBM, has successfully developed a blockchain solution that will serve as a 'single source of truth' for insurance companies and brokers. The solution, developed alongside major New Zealand insurance provider Suncorp, set out to improve on the existing inefficiencies of a complicated reconciliation process wherein an individual's payments toward an insurance company are made through a broker who sold the insurance product. Further, the blockchain solution also integrated an automated payment process, provided by ANZ, to enable straightforward bulk payments that are immutably recorded and tracked on the ledger.

2. Australia's Biggest Stock Exchange Targets Blockchain Integration

17

### in 2020

The Australian Securities Exchange (ASX) has said it will implement a blockchain-based post-trade system from as early as Q4 2020, replacing the current Clearing House Electronic Subregister System (CHESS) system. The new system will allow settlement participants on both sides of a bilateral transaction to pre-match the transaction earlier in the settlement period without committing the transaction for settlement. New York-based fintech company, Digital Asset is building DLT products, is the main technical partner for the initiative. Migration testing will begin in Q2 2020 and will culminate with migration dress rehearsal weekends in preparation for go-live.

### 3. Ripple Adds Another Bank to Instant International Payments Blockchain

Ripple's global enterprise blockchain network has added its latest member in BankDhofar, an Oman-based financial institution. RippleNet is an enterprise blockchain that sees over 100 financial institutions globally as members including banks, payment providers and financial institutions. The bank said the implementation of Ripple's blockchain technology in payments will help save its customers 'both time and money' when sending remittances overseas. BankDhofar hopes to put digital technology and innovation at the core of its strategy to improve the experience of its customers.

### **3.2 International Policy**

1. Indian Law Protects Cryptocurrency Investors Despite Lack of Regulation

The Indian crypto ecosystem has come across a series of shaking events in the recent past which have caused the investors to re-evaluate their decision of investing their hard earned money into the uncertain yet lucrative sector of cryptocurrency. The Indian Government, through RBI, has partially disclosed its mind on the legal prospect of Crypto by proclaiming that the banks shall not provide services to crypto players. The notification by RBI acted as a massive jolt to the fast-growing Crypto market in India. Since no law in India prohibits the buying and selling of cryptocurrency, therefore the said investor-exchange contract is a legally valid one as long as it fulfills other essential ingredients of a contract as mentioned above.

Source:<u>https://www.ccn.com/indian-law-protects-cryptocurrency-investo</u> rs-despite-lack-of-regulation/

2. Iran State Cryptocurrency 'Ready' for Experimentation: ICT Minister

Within days of the country's central bank banning trading of cryptocurrencies and barring domestic banks from offering services to industry firms, Iran's Information and Communications Technology (ICT) Minister Mohammad Azari-Jahromi confirmed progress being made with

### Huobi

a domestic cryptocurrency project. Details of the state cryptocurrency project are scarce but it is a notable development at a time when the Iranian trial, the country's fiat currency, plummeted to an all-time low as recently as April amid fears of a return of US-led financial sanctions.

Source:<u>https://www.reuters.com/article/uk-crypto-currency-iran/iran-cry</u> ptocurrency-project-on-track-despite-cenbank-ban-minister-says-idUSK BN1HZ0O6

### 3. US Regulators Examining Whether Ethereum is a Security

Regulators at the Securities and Exchange Commission (SEC) and Commodity Futures Trading Commission (CFTC) are investigating whether many popular cryptocurrencies — not just initial coin offering (ICO) tokens — should be regulated as securities under federal law. The inquiry includes a focus on ether, representing a significant threat to virtual currencies, which so far haven't been drawn into a regulatory crackdown on potential fraud in the market for the assets. They will also consider whether ether, currently the second-largest cryptocurrency by market cap, is sufficiently used for its stated purpose — to run applications on the network — or is essentially a speculative asset purchased in the hope that its value will grow in the future. Ethereum co-founder Joseph Lubin is not concerned. He believes regulators will determine that ether is not a security.

#### Source:

https://www.ccn.com/extremely-comfortable-that-ether-is-not-a-securityethereum-co-founder/

#### 4. South Korea Bill Pushes Legalization of New ICOs after 2017 Ban

Hong Eui-rak of the Democratic Party of Korea, the political camp in power, is leading the charge – through the parliament – to challenge the government's ban on initial coin offerings (ICOs) in September 2017. Hong insists that the proposed legislation to legalize new ICOs will be

#### Huobi Research Weekly

under the government's direct scrutiny. Further, the report suggests that the bill favors ICOs stemming from public organizations and research centers that are 'committed to promoting and developing blockchain technology'. Government agencies including the Financial Services Commission (FSC), Korea's financial regulator, and the Ministry of Science and Information and Communications Technology (ICT) will wield powers to supervise these ICOs, the bill reportedly conveys.

### Source:

http://koreatimes.co.kr/www/news/tech/2018/05/129\_248349.html

#### 5. Venezuela to Launch Petro-funded Youth Bank

Venezuela will open a youth bank funded by the government's state-backed petro cryptocurrency, the country's president Maduro said on Thursday. He committed to funding the project with 20 million units of its recently-launched petro currency, which he says are collectively worth \$1.2 billion. Venezuela has also pressured state-run businesses to accept the token as payment. Venezuela further claims that the petro will replace the hyperinflated bolivar as its official currency by 2020 and that it will soon have a sister cryptocurrency, the petro gold. Notably, Maduro said elsewhere during his speech on Thursday that local universities should establish cryptocurrency mining farms to help strengthen the Venezuelan economy, which has seen prices rise by 18,000 percent in two months.

Source: https://www.telesurtv.net/english/news/Venezuela-to-Create-Digit al-Cryptocurrency-Bank-for-Youth-20180503-0026.html

#### **3.3 Technology Progress**

### 1. Mastercard International Seeks Patent For Fast Tracking Blockchain Navigation

Mastercard International Inc. has applied for a patent for a system for fast tracking navigation of blockchains by means of data manipulation. The system is designed to facilitate quicker navigation and verification of

blocks in a blockchain. The application notes there is a need for a technical solution to increase the speed at which a blockchain can be navigated for verification of a large number of blocks and reduce the time needed for a new node to begin participating in the blockchain. Each block in the system will have a header consisting of a fast track flag, fast-track reference, a timestamp and a hash value. The use of specialized flags and hash values included in the block headers can allow the speed of navigation to be increased significantly, which will greatly reduce the computing time and power needed to verify the blockchain, according to the patent abstract. The result will be more efficient navigation and verification of the blockchain.

### 4. Weekly Project Progress in the Market

### 4.1 New Digital Assets this Week

There are 114 new digital asset projects that completed public financing this week. Judging by the country, 106 assets was collected with country information, and the top three countries with the largest number of new digital assets are the UK, the US and Russia. The UK has 16 projects, accounting for 15.1% of the total; each of the US and Russia accounts for 13.2% and 11.3% respectively. Each of the rest 36 countries owns less than 3% and they sum up to 45.3%, less than a half. For the 17 countries with smallest amount of projects, each of which owns only 1 project. Judging from the types of projects, 107 asset projects have been clearly categorized. The largest asset class is infrastructure, which includes 32, accounting for 28.9% of the total, followed are blockchain finance (16.8%), culture and entertainment (8.4%), platform (6.5%), social (5.6%) and exchange (5.6%). Each of the last 14 fields shares less than 5%. In general, new digital assets this week was concentrated in the United Kingdom; asset types are basically application-type, and blockchain infrastructure is the main application area.

Huobi Research Weekly
